Good Afternoon.

The financial report of the Schoo committee to June 30 is of interest, ecause of the action of the City council in largely reducing the estinates. Six months of the school year garten school. of ten months have passed, and the xpenditures have been \$56,431.00 ou f \$98,000 00, leaving a balance of \$41, 569.00. Were the bills for six month all paid, it might be possible for the School Committee to live within the appropriation if no additional accommodations were needed, as less than 5 per cent. of the appropriation has been expended.

It is probably a fact that all the bill for the six months are not paid, as many would not be presented until after July 1. Again the winter's supply of coal and wood has not been out in. Then the new Cranch schoo will be ready to open in the fall, and additional quarters will be necessary or perhaps 100 at the High school.

The School Committee have effected Rhode Island. a saving by placing the John Hancock and Lincoln schools under one principal, and may be able to obtain new Superintendent at a few ht ollars less. But it is very doubtfu f \$41,569.00 will pay outstanding bills and support the schools for the remainng four months of the school year by any system of economy. The School Committee should be given the credit of trying to cut the garment according o the cloth.

The readers who consult adverising columns are home-and-fireside eaders. The advertising columns do arry news to them and they read those olumns to get that news. The fact that advertisements bring customers to the merchant's counters proves that the news is read and believed. These are the facts that make the country weekly, semi-weekly and daily papers comparatively more valuable as adverising mediums than the city dailies. The rural papers are almost entirely distributed to homes to be read. The advertisment that gets into a home is going to earn money there for the advertiser. The man who is surest of reaching the family, which is the very fountain-head of the stream of custom terian church on Sunday morning, sevhe desires, is the man who advertises eral from out of town joining the local

THE IDEAS OF DREAMLAND.

Writer Who Finds Them Only Plausible but Empty Fakes.

"Every one has read at times of sto ries or ideas for invention the result of dreams," said a well known writer who has produced a number of clever humosous short stories and several books. "Do not be taken in by them, my boy. The ideas of dreamland are only plausible but empty fakes.

"Most of my writing is done at night after the family has retired and the house is quiet. When I finish my work, I go to bed, be it 2 or 4 o'clock in the morning, with my brain at the boiling point. Then I plunge at once into dreamland. I don't know the way dreamland. I don't know the way there or how to get back, but I always WHAT manage to return, probably piloted by a crazy idea. good stories than I could write in a thousand years if I were ambidextrous-that is, when I dream them they are good. As I dream I say to myself: Oh, if I were only awake, that I might jot this down! This is the best idea I have had in a year. What a corking story it would make! But I'll be sure to forget it when I wake "One night in a dream I made up my

had dreamed and write it as soon as I got up in the morning, while it was still vividly impressed, in all its humorous details, on my mind. Following this, with the suddenness of the turn of a kaleidoscope, came a dream in which I was having a most exciting experi ence with a purple mastodon with long shining gold tusks, of which I was trying to rob him to make a gun rack for the reception hall. I forgot all about the previous good story. I knew that I was forgetting it, and in my puny struggle with the mastoden made a violent mental effort to retain the story and at the same time secure Coates House, the Baltimore and the happened no one knows. The carriage the tusks. Just as I got the better of Midland hotels, a shifting and drifting was found overturned, on the Kimball's the mastodon I awoke and tried to crowd gathered and discussed the two Pond road, while Murphy was found think of the story that I might get up and make coplous notes of it. But the story was clear gone, and the mastodor incident was so utterly foolish that I turned over in disgust and went to sleep again.

"One night I dreamed a most excru ciatingly funny story about the adverture of a character called Fiddlesticks As I dreamed it I reckoned it at about 5,000 words and knew every word of vidower, about 45 years old, and leaves it, so that had I been awake I could have written it word for word as it oc curred in the dream. It was great, and knowing my weakness of forgetting my dream stories, I resolved to remem ber it. I did remember it in the morn ruite suddenly of typhoid fever at the ing, and it was the most incoherent, silly stuff in the world. That is al ways the way with dream ideas. "Again I dreamed a story. This was

the best of all. As I dreamed it I thought what a sensation it would pro duce and what a reputation it would bring me. The story was complicated yet simple and such a plot as the most ingenious intriguer could hardly pro duce. It was full of situations both humorous and pathetic. and the diawrilliant officer. List of Missing Men In Hoboken Disaster Reaches Nearly Three Hundred.

Grappling Hooks Bring Up Sixty-Seven Bodies.

Bteamship Company Is Treating the Survivors In a Most Generous Manner.

New York, July 3.-Although it is still mpossible to tell exactly how many ives were lost in the great fire that wept away the piers of the North Ger nan Lioyd Stoamship company on Sat urday and destroyed three of its ships the best estimate that can be obtained is that close to 300 members of the crews of the burned vessels perished. Sixty seven bodies have thus far been given up by the waters of the North rive Each hour that passes witnesses additional recoveries of bodies, seared maimed and burned beyond all semblance of human flesh.

And the half has not yet been told, as ill of the bodies brought to the surface esterday were caught on grappling looks. About the first of next week eople will realize the appalling loss of fe, as it will then be time for the bodies that are now lying at the bottom of the iver to come to the surface of the wate rough natural agencies. The list of missing is still placed just

low the 300 mark. The bodies recovered up to 11 o'clock ast night include 41 now in Odonell's ndertaking establishment in Hoboken, 0 at Hoffmann's of the same city, 12 in he morgue in New York and 4 on the ecks of the Saale, which were recovered oo late last night to be brought to eithe ity. Of these 37 have been either posively or partly identified, most of them so far as has been discovered, being ictims from the steamship Saale.

Those who will undoubtedly swell the list of the dead are the 240 odd men from he steamships, including officers, subofficers, seamen, oilers, machinists and oal passers and trimmers, the greater ss, of course, being among the men wh ere below decks and could not get to back and the heavy falling debris bea them down to their death. Of these the greater part are foreigners, and the lists of their names are being checked of by the steamship company officers as soon as any identification can be made Then, too, there are some 35 people who were on canal boats, lighters and about docks in various capacities.

The North German Lloyd company is a great, helpless cripple for the time eing. Her two ships, the Bremen and Main, smoked all day yesterday; the Saale was just beginning to show the in the hot sun, giving off the stifling odor of its burnt wood and smouldering merchandise.

Good Afternoon.

The City Council in holding two essions on Fourth of July week, is vacation. They get all tired out in making the preparations.

Quincy people cannot be blamed if hey go out of town on the Fourth and spend their money for enjoyment. The ocal attractions are few and far beween and of a minor nature.

The loans authorized by the City Council of 1900 already amount to over \$100,000; too much for any ordinary year. While Mayor Hall has been unsuccessful in his efforts to check the large expenditure, it is hoped he may stop further extravagance.

be over-ridden, and it was a close call for Copeland street. The persausive arguments of President Bryant kept hose in line who have favored the improvement, and West Quincy owes the uccess of the measure to him.

Drift of Opinion.

The clergymen cannot complain of a lack of business at all events. With the numerous weddings which have taken place and those to occur, the vacation funds of the parsons must be fattening up to a gratifying extent. -Haverhill Gazette.

Monday afternoon, Motorman Shea of the Squantum line, who is also a special officer, was informed that three oys were stealing wire, and were then n hiding behind a fence. When the car arrived where they were, Motorman Shea stopped the car and jumped over the fence, and caught the boys whom he brought to Quincy. Later, a quantity of the stolen wire was found behind the fence. When confronted ing about them instead of their neigh with this, the boys owned up. Their names were Lawrence F. the Relief of Pekin.

Eerman at Pekin Sends a Message Which Indicates a Fearful Tragedy

London, July 3 .- While nothing but simister news comes from northern China, southern China is seemingly breaking away from the empire. All the provinces south of the Yellow river, whose viceroys and governors maintain friendly relations with the powers through the consuls, have been informally constituted into a federacy with Nankin as the capital.

According to an Express cable from Shanghai, dated July 2, the southern viceroys wholly disavow Prince Tuan's government. They have practically constituted an independent state, exending from the Hoang Ho to the British and French frontiers. Mr. Metcalf's copy, after re-affirming the Chicago platform and referring esecially to the ratio in the coinage of the netals, denounces the trusts in drastic anguage, and in the same connection efers to the protective tariff as one of the principal supports of the trust system. It also condemns the alleged tendency of the present Republican adninistration toward imperialism and the ncrease of the standing army. Sympathy is expressed for the Boers in their struggle with Great Britain, and the president is condemned for his failure o take decisive steps looking toward he manifestation of the sympathy of the American people with the people of the Transvaal.

In connection with the expression on the Boer question the assertion is made that it is evident to all men that a seeret alliance exists between the Mc-Kinley administration and the British govnment, and this alliance is denounced is revolting and repulsive to all liberty-

The platform also takes positive poition on the Philippine question, proouncing in favor of a policy looking to the Pacific archipelago, with a promise of protection to the people of that country against foreign aspersion by the government of the United States, similar to that which is vouchsafed by us to the South American republics.

Planks have been suggested covering the questions of Chinese immigration, good roads, the irrigation of lands, free omes and equal suffrage for women.

parts are: First-We have the issue fraught with ndescribable importance to our people native born, and those who have for with us mainly, that of the republi against the empire. On this part alone of the 16, if there were no other, we confidently expect to win a sweeping vic-tory in November. The Republican party stands for empire. The Democratic party stands for the republic, for disposed of. But even in this there was the declaration of independence, and the onstitution of our country.
Second—The paternal and fostering

care given by those with whom we con-tend to the combinations of corporations and companies into powerful organizations familiarly known as trusts.
Under three years of Republican rule trusts have been propagated and fostered by legislation until they not only dominate all markets, both the buying and selling, but defy the very power of

the government itself.

The farcical efforts put forth by the Republican party in an alleged attempt o restrain them in the dying hours of he late session of congress only excited ridicule and contempt.

Third—Called to power March 4, 1897, under a pledge to reform the currency,

they seized the first opportunity to faster upon the land the highest protective pon the land the inglished ariff law ever put upon the statute books of any country. This law was enacted not to raise revenue, but to give protec-tion to favored manufacturers. It failed to raise sufficient revenue for the govrnment, but answered the purpose on iching the favored few while it robbe the many, and, at the same time, brought forth trusts to plague us. Their high protective tariff is the mother of trusts. When the committee reassembled Mr Fourth-This administration cam rourun—This administration came into power with a solemn declaration in favor of bimetallism and a pledge to promote it. It has failed to keep that pledge. It has erected in its stead the single standard of gold, and has endeavored to destroy all hope of bimetalism. In doing this it has built up powerful national bank trust, and has given us a currency based upon the debts and liabilities of the government. We stand for bimetallism and not for monometallic standard of either one or the other metal. Fifth-The dominant party has re-

that it favored the Monroe doctrine; an yet their president and secretary state have done all in their power nullify and abrogate that famous are much revered Democratic doctrine. We stand for this doctrine in its essence and form, and demand its rigid enforcemen form, and demand its rigid enforcemen Sixth—In order to obtain place an power they pledged themselves, in the interest of an expanding commerce, to construct a waterway to connect the two great oceans. They have repudiate this commerce. They have negotiate the Hay-Pauncefote treaty which, while it virtually abrogates the Monroe doctrine renders it impossible to build a support of the control o trine, renders it impossible to build an American canal. Under the terms and provisions of this treaty, which is English and not American, the canal can never be constructed. We stand for an American canal, owned, constructed, operated and fortified by America. Seventh—They declared in their play form that their party was responsible for the merit system; that it was their creature and that the civil service law should be protected and its operations

### THE NIGHT BEFORE. LATEST!

The Rain Dampens the Ardor of the Early Celebraters.

Tuesday night was unusually quie many who expected to have their slumbers rudely disturbed were agreeably disappointed. The lack of racket was in no way due to lack of enthusiasm on the part of young America, for he was as alert and ready for a noise as ever. But the elements put a damper on such sport. Many of the boys had planned for an al night racket, and to make it pleasant for the special officers or at least see hat they were kept busy and earned their money.

Along about 7 o'clock, however, a few big drops of rain fell. These were quickly followed by more, and from a thorough wetting. About 9 o'clock the large fire in Bos-

ton furnished a bright illumination and resignation of Supt. Lull. many sought vantage points to obtain a better view.

At the same time the standards of the state delegations were torn from their sockets and waved on high, while umbrellas of red, white and blue, silk banners of the several states and many handsome and unique transactions were horner about the houlding.

Hawaii, through its native delegate John H. Wise, made its first seconding speech in a Democratic national convenion. Several other seconding speeches were made, and finally a sweet voiced and pleasant faced woman alternate from Utah seconded the nomination o Mr. Bryan in behalf of the state of Utah. Then came the voting. State after state recorded its vote in behalf of the Nebraska candidate and giving him the unanimous vote of all the states and territories. The convention managers

had already agreed that was sufficient work for the day and the vice presiden nomination was allowed to go over until Next to the demonstration for the nouncement that imperialism was to be the paramount issue of this campaign was the most spontaneous and significant of the day. We favor expansion by every peace-'ul and legitimate means. The importance of other questions not bending before the American people in n no wise diminished and the Demo cratic party takes no backward ste from its position on them, but the burn ing issue of imperialism growing out of the Spanish war involves the very ex-istence of the republic and the destruc-tion of our free institutions. We regard it as the paramount issue of t

The declaration in the Republicar platform adopted at the Philadelphis convention, held in June, 1900, that the Republican party "steadfastly adheres to the policy announced in the Monree loctrine," is manifestly insincere and leceptive. It will im se upon our peace loving people a large anding army and unnecessary burder standing army and unnecessary burden of taxation and a constant menace to their liberties. A small standing army and a well disciplined state militla are amply sufficient in time of peace.

Concerning Trus's. Private monopolies are indefensible and intolerable. They destroy competition, control the price of all material, and of the finished product, thus robbirg both producer and consumer. They lessen the employment of labor, and arbitrarily fix the terms and conditions thereof and deprive individual energy nd small capital of their opportunity or betterment.

They are the most efficient means yet devised for appropriating the fruits of industry to the benefits of the few and at the expense of the many, and unless their unsatiate greed is checked all wealth will be aggregated in a few hand and the republic destroyed. The dis honest paltering with the trust evil b the Republican party in state and rational platforms is conclusive proof the truth of the charge that trusts a policies; that they are fostered by R publican laws, and that they are preceded by the Republican administration

The new turn relative to the widen ng of Copeland street was a surprise being Wyoming, Colorado, Utah and to City Hall as well as West Quincy The point raised is regarded as a goo one, and it is probable that the question will be submitted to City Solicitor Sears.

The West Quincy friends of the measure, who have fought so long and earnestly for the improvement, and thought the measure was clinched realize that more work may be neces sary. They are a little at sea at present

They hope, of course, that it may be lecided that the private interests of Councilman Elcock are not distinc from that of the public. But it generally admitted that his private nterest is greater than that of Council man Faxon in electric lighting orders upon which he never votes.

The question may arise whether th whole vote is null and void, or simply the vote of Councilman Elcock. If new vote be taken. Councilman Free man or Hogan, the absentees at the las meeting, might vote in favor, bu there is some doubt as to how both would vote. the propriety of going into details on certain portions of our financial policy, but the wisdom of this convention has

determined otherwise, and I acquiesce cheerfully in the decision. I am here to say further that the plat-

form that has been read is worthy of the vote and approval of every man who claims to be a Democrat in this country. Those who do not admire some portions cannot speak for others. If there are some issues which they do not desire to present as strong as some others, they

present as strong as some others, they can at least talk about something in this platform that is worthy of their ap-

going to carry and carry strongly. This is the time for unity and not for devision.

I plead tonight for party harmony and party success. I plead because of the dangers which confront us. As sure as election day comes and if we should happen to be defeated, which I do not believe, what will follow? It means the restoration of a federal election law. It means a reduction of the apportionment

it will be apparent by election day that some of the new born states of the west, which they had relied upon, had gone over to the Democratic party.

So I am here to say that this is a most important election; important for our party; important for our country; im-portant for the best interests of all our people. I have no time to analyze this

latform. We are speaking of men and

ot of measures now.

This nomination will meet the ap-

proval, based upon this platform, of the people of the east. What we need is an old fashloned rousing Democratic vic-tory throughout this land. That will

nean a restoration of the currency of our athers; that will mean home rule for

states; that will mean popular govern-ment restored; that will mean the su-premacy of equal laws throughout the country; and in this great result which

we hope to achieve, I am here to say imply in conclusion that New York ex-

Probability That All the Foreigners In Pekin Have Been Slaughtered.

News of Greatest Crime of the Century Looked For.

May Include the Outraging of English Women and Torturing of Children.

London, July 6 .- Chinese cumulative eports, which are generally believed here, declare that all the foreigners in Pekin have been massacred.

The story that all foreigners in Pekin were murdered on June 30 or July 1 appears to be circulating simultaneously at Che Foo, Shanghai and Tien Tsin. Yet, as it is not confirmed by official dispatches and is not traceable to the southern viceroys, who are still in certain communication with Pekin, there is a easis for the hope that it is untrue.

Cautious observers at Shanghai recognize that even though these reports are rejected, events in Pekin must be galloping to a tragic end. Correspondents of The Express at Shanghai gather details from Chinese sources, which, pieced to gether, relate that when the foreigners' ammunition was exhausted the Boxers and imperial troops rushed the British legation and poured into the courtyard Bicycles is at with fanatical fury. The moment the mob broke the courtyard was converted into shambles. One correspondent adds:

"It is only left to hope that in the final rush of the murderous hordes the men of the legations had time to slay with their own hands their womenkind and children. The Chinese are whispering the terrible story under their breath. Their attitude toward foreigners in the treets has undergone a strange change. The demeanor of the better class o Chinese is one of pity rather than of riumph; even the rabble in the native quarter are silent."

Two Manchus who arrived at Shanghai certify to the truth of the statement that Prince Tuan visited the palace and offered the emperor and dowager empress the alternative of poison or the sword. The emperor, they say, took raftily swallowed only a portion of Telephone, residence. what was offered her and survived.

The correspondent of The Daily Mail at Shanghai, telegraphing under date of July 5, says he believes that when oficial information comes regarding Pekin may include news of the outraging of mittee. Once the disputed points had English women and the torture of children. It may also be taken for granted, he asserts, that all the foreigners in Pekin have been wiped out. These are ommittee's work. The main point of the whisperings of startling rumors in difference lay in the attitude of the party the native quarters: and it must not be on expansion, and on this point both the forgotten that the telegraph lines over which alone the news can come are solely in the hands of the Chinese. The lines, the eastern members favoring native rumors are likely to have their condemnation of imperialism, while source in a solid basis; and the native most of the members from the western officials are believed to be preparing the vay for the reception of news of the nouncing imperialism was finally greatest crime of the century. adopted, and in this shape the platform

A letter brought by courier from Pekin, eceived in Shanghai on July 4, says the Boxers are gathering huge forces about Pekin. Reinforcements are arriving from all directions. This is taken to indicate a concert of action among the nobles who are believed to have thrown in their lot with the Boxers.

The Shanghai correspondent of The Daily Telegraph wires, under date of July 4: Yuan Shikai, governor of Shan Tung, telegraphs the French consul here that Prince Tuan is preparing an edict ordering the extermination of all foreign ers. This is probably intended to p.epare the public for the worst news.

### Wicklose & Wickless Blue Flame Oil Stoves.

They make summer cooking a pleasure. You'll never know what economy in housekeeping is until you use one of these stoves. They burn common oil, that makes a purified blue flame like gas. Actual cost while using, 2-3 of a cent per hour.

One of these stoves in your home will pay for itself in money saved, to say nothing of the convenience and comfort. The best makes to choose from.

CHRISTIAN ENDEAVOR.

Topic For the Week Beginning July S-Comment by Rev. S. H. Doyle,

Topic.-The power of small things.-Mark iv,

The parable of the mustard seed requires no particular explanation or elaboration. It is simply a readily understood illustration of the power of small beginnings, and was spoken to illustrate this character of the Christian church. There are many people who despise the day of small things, but it is most unwise to do so. Small things may have great powers either for good or evil, and both in the natural and the spiritual world God often begins His great works with a day of small things.

1. The power of small things in the natural world. This is illustrated in the mustard seed. "A grain of muswholesome, familiar smell of "green tard seed" was a common expression among the rabbis for anything exceedingly small. It was among the smallest and tiniest of the seeds, and yet and shooteth out great branches: so So Lester drove Priscilla to the train. ens are fit to fry," Mrs. Willits was that the fowls of the air may lodge under the shadow of it." The moss is but a very little plant, vet when its seeds morasses they grow up and bind the ground together with such bands that it becomes quite safe to pass overbuilding, in fact, a broad and durable bridge. Throughout creation the grandest and most complicated ends are obtained by the simplest means. It is hind the simple means.

2. The power of small things in the weak and insignificant beginnings. The mustard seed is a type of the kingdom of heaven. The origin of the Christian church was most insignificant. Skeptics would have been inclined to smile had they heard Christ say to His little | years band of followers, "Go ye into all the world and preach the gospel to every creature." But who would smile at this command today? The mustard seed has become a great tree, its branches spreading over all the earth and sheltering and blessing all mankind. Works of grace in an individual heart, in a community or a nation, are often very feeble at the start, but un- Post. der the blessing of God assume gigantic proportions in the end. That God thus works in the spiritual world should encourage and inspire all Christian workers. We may only be able to do small, insignificant things for God or for His church, but the results from these trifling efforts may be very great. Let us not despise the day of small things.

Doing Christian Work. Conditions for Christian work vary but it must be prosecuted whether they seem favorable or unfavorable. Ou Lord can utilize the most unpromising circumstances to the best account, and it is ours to go forward in dependence upon divine guidance and strength, do our duty and leave results with God. If He gives us only limited means, we are not to despise them, but to use them to the utmost of our ability. A GRAVE MISTAKE

In one week Lawrence Reynolds was to marry Gertrude Dixon of Scranto

One evening he received the following anonymous letter:
"Mr. Lawrence Reynolds," it said, "you think that you are on the highroad to success. You believe that you are loved for yourself alone, and the though never occurs to you that you may be only a miserable dupe. Gertrude Dixon loves you, but she loves money better. Remember my words, 'There's many a slip 'twixt the cup and the lip,' and old Montgomery, the millionaire, is paying your affianced bride very close attention. I warn you. Of course, you will not heed my warning, but the day will come when you will remember my words to your

That was all; no signature, no date. He crushed the letter into his pocket his face pale as death, and, pouring out a glass of water from a carafe upon the table, drank it eagerly. "I will go home," he muttered. "How can I believe one word of that cowardly letter? It is true that I have not heard from Gertrude lately with regularity, but her excuse has been a good one. She has been so occupied with preparations for the coming event. I will pay no heed to the cow ardly blow struck in the dark. I will go to Seranton tomorrow, and when I have told Gertrude all we will have a merry laugh at my expense."

He put on his overcoat and gloves and donned his hat and made his way into

God bless you, my darling-my wife to he He reached his hotel, and two hours later was ready for an early departure, and in the gray light of the dawn Lawrence Reynolds started upon his journey.

It was a three days' trip. Stopping at a town on the route, several passengers entered the coach in which Lawrence was traveling. Among them was a young man from Scranton with whom he was acquainted. The two greeted each other warmly, and George

"I have been up the road a day's journey." he said, "and am on my way home to Scranton now. Going to be a grand wedding tomorrow. Have you heard of it? Your old friend, Miss Dixon, is going to marry Montgomery, the rich broker. He is immensely wealthy. She will be the most envied woman in Scranton. Why, Lawrence, what is the matter?"

"Nothing. I am subject to attacks of pain in my heart. By the way, are you sure of this piece of news, George?" "Yes. There could be no mistake, for Miss Gertrude told me she was soon to be married, and as old Montgomery has been devoted in that quarter for a long

> "Died suddenly, of heart disease, in Scranton, Miss Gertrude Dixon, aged 22 And in the marriage notices this: 'Married, at the residence of J. Dixon, Esq., on Thursday, the 20th inst.,

Miss Grace Latham of Aberdeen to James Montgomery, Esq.' The paper fell from Lawrence Reynolds' hands, and he knew no more. For a long time he remained unconscious, and when he awoke to life again he was raging in the delirium of brain fever. It had all been a mad mistake. The anonymous letter had been written by some coward who had secretly hated Lawrence Reynolds. The marriage to which George Lennox had referred in speaking of the approaching wedding to take place at the Dixon residence was that of her cousn Grace, as well as her own wedding soon after. It was all a mistake.-Boston

Dover, N. H., July 7.-John Williams ohn Farren, William Scott, Frank Gold and John Brown, three of whom are supposed to be the men concerned in the murderous assault upon four men on the night of July 4, resulting in the death of John McNally and Thomas Dobbins, were rounded up Friday afternoon by Assistant City Marshal Wilkinson, assisted by other officers, and placed under arrest. The men, with the exception of Williams, were found at the Waverley House, two miles from this city, where they had spent the night. Williams, who was the man most wanted, was found asleep in the bushes beside the road a short distance away.

Edward Ellis, who lives near the Waverley House, came to this city and otified County Solicitor Scott that there vas a party of men there, some of whon nswered the description of the mer anted for the murder. Mr. Scott col ected a squad of officers and accompanied them to the house. Upon arrivng there Marshal Wilkinson was the first to enter. The men saw him coming nd scattered in different directions. He saw Farren going through a window and grabbed him by the shoulder, where upon Farren drew a revolver, Wilkinson pulling his own weapon at the same time. At this moment Officer Young prang into the room, seized Farren, took the revolver from him and soon had him in irons. Gentlemen:—I must say in regard to GRAIN-O that there is nothing better or healthier. We have used it for years. My brother was a great coffee drinker. He was taken sick and the doctor said coffee was the cause of it, and told us to use GRAIN-O. We got a peckage but did not like it of first here. got a package but did not like it at first, but now would not be without it. My brother has been well ever since we started to use it. For Women.

Dr. Tolman's Monthly Regulator has brought happiness to hundreds of anxious women. There is positively no other remedy known to medical science, that will so quickly and safely do the work. Have never had a single failure. The longest and most obstinate cases are relieved in 3 days without fail. No other remedy will do this. No pain, no danger, no interference with work. The most difficult cases successfully treated through correspondence, and the most complete satisfaction guaranteed in every instance. I relieve hundreds of ladies whom I never see. Write for further particulars. All letters truthfully answered. Free confidential advice in all matters of a private or delicate nature. Bear in mind this remedy is absolutely safe under every possible condition and will positively leave no after ill effects upon the bealth. By mail securely sealed, \$2.00. Dr. E. M. TOLMAN CO., 170 Tremost St., Boston, Mass.

Quincy will soon be as famous for circumstances. I wouldn't play it if pilgrimages as Plymouth and Concord, Surely there are many historic spots of National interest, and enterprises which are novel to many. A brief list is given below.

### Fine Ocean Resorts.

In no section of the country can so wide a variety of shore resorts be found as on the North Atlantic coast. For the fashionable set. Bar Harbor and vicinity has long been a favorite resort, but York, Marbiehead, Manchester. Rve, the Hamptons, Kennebunk, Old Orchard, Scarboro and a hundred others are watering places to which multitudes flock early in the season, and the satisfactory results of the summer's sojourn are evinced by the brown faces, bright eyes and jovial spirits which one encounters at the end of the season.

Have you thought of a vacation trip yet? If not, you should have the "All Along Shore" book published by the Boston & Maine railroad, and by addressing the General Passenger Department, Boston, Mass., inclosing a two-cent stamp, the book will be sent you. It will materially aid you in selecting your outing place.

Half a dozen men were talking trout in one of the up town hotels after a shad supper the other night. One of the party told of a three pound fish that he landed with a five ounce rod last summer, and another of a seven pound blackfish caught with a similar rod by a well known newspaper man off the Great Kills, Staten Island, last summer. He was fishing for snappers (bluefish fry) and, hooking a blacktish in shallow water, near an old sunken wreck that lies there, fought it for over an hour and landed it. So the fish stories, true and otherwise, went on. Finally one of the party, a guaner, said, with a laugh: "To hear you fellows talk one would

blind him, and I am a little skeptical about these fish stories.' The best fisherman of the party replied: "Well, you are a pretty good swimmer. I'll tell you what I'll do. I'll bet you a suit of clothes that if you will play the ish, with an ordinary trout line attached to a swivel between your shoulders, I with a six ounce pole, will land you and bring you to bag."

The bet was accepted, and a few days ater the contest came off in one of the swimming baths of New York city.

A piece of ribbon was passed in a loop ver each shoulder of the man fish and fastened between the shoulders to a fair sized swivel, to which was attached a 37 strand English woven silk line, which was reeled on an ordinary 51/2 ounce both here and abroad. There is hardly a trout rod. The fisherman stood on dressy gown or hat from Paris that has the diving platform, rod in hand, with the ine rather slack, and the fish stood half way down the bath. The fish was to take a header, and this was to constitute the strike of the fish. ### THE CANDIDATES MEET

Bryan and Stevenson Confer With Other Leaders at Lincoln.

Bryan Not Likely to Tour the Country, as He Did In 1896.

Question as to Towne's Withdrawal From the Populist Ticket Is Still Undecided.

Lincoln, Neb., July 13.-Adlai E. Stevenson, Democratic candidate for the vice presidency, arrived in Lincoln yesterday to attend a conference of the Democratic leaders.

Those present at the conference were W. J. Bryan, Adlai E. Stevenson, Charles A. Towne, Senator J. K. Jones, chairman of the national committee, and National Committeemen Stone of Missouri, Campau of Michigan and Johnson of

Plans for the national Democratic campaign of 1900 were outlined and practically agreed upon. The plans include the appointment of a campaign committee, as agreed upon between representatives of the Democratic, Silver Republican and Populist parties at Kansas City. This committee will include members of all three parties, and perhaps also Democrats not members o the national committee, but who are prominent in the councils of the party.

This committee will, it is said, have charge in a measure of the practical working of the campaign and will work for fusion on state and congressiona tickets whenever possible. The press and executive committee, it is expected, will, with one or two exceptions, be the same as last year. The personnel of all the committees was left in the hands of Chairman Jones. The question of national headquarters was also left in his hands. It was stated that Chicago would probably be selected.

Mr. Bryan said that he had made no plans as to the part he would take in the campaign and would not do so until he had conferred further with the party leaders. The subject was discussed a the meeting, as well as the amount of campaign work to be done by Mr. Steven son, but this feature will not be fully decided on until after the formal notification of their nomination has been given to Mr. Bryan and Mr. Stevenson, which

will not be for several weeks. Committeeman Johnson of Kansas however, stated after the meeting that an understanding exists that Mr. Bryan will not tour the country as he did dur ing the campaign of 1896, but will make trips from time to time to the larger centers of population, remaining in Lincoln a great deal of the time.

Mr. Towne may not announce his decision in regard to the vice presidency for several days, although several Populist leaders in the city stated that he might announce his withdrawal to the Populist executive committee at once. Democratic leaders, however, state that the whole question has been postponed until after the Middle-of-the-Road state Towne's defeat in the Democratic convention be noticed a conference with the Populist leaders will then be held, at Fall River, Mass., July 10.-An un- which time, it is expected, Mr. Towne's

## PLOT TO ASSASSINATE.

President McKinley's Life Placed In Jeopardy by Group of Conspirators.

Daid to Have Been Hatched by Spainards and Cubans.

Plans Miscarried by Reason of Warning Letter From One of the Plotters.

New York, July 11.-A plot to assassiate President McKinley has been frusrated, according to a story in today's panish and Cuban conspirators, with eadquarters in New York.

One of the plotters weakened and sent warning letter to a member of the Reublican national committee. That etter was placed in the hands of Secreary Dick, who referred it to Chairman Odell of the New York state committee or investigation.

Chairman Odell engaged a detective, ho speedily verified certain important llegations made in the warning letter. hereupon Mr. Odell reported to Secreary Dick, who laid all the facts before hairman Hanna. Messrs, Dick and Hanna laid the whole matter before the president shortly before he departed for

Chairman Odell of the New York Reublican state committee admits the ruth of the report that certain members f the national committee had discovered plot to assassinate the president.

"Mary, how do you like the Ivory Soap?"

"Best we have ever had, ma'am. The starched clothes are whiter and the flannels are softer than when washed with common soaps. It saves my hands; they used to be very sore after a wash."

"Well, Mary, I am told that it saves the clothes, too, and you shall have only Ivory Soap after this."

### ISSUES OF CAMPAIGN

Discussed by Bryan, Towne and Others at Ratification Meetings.

Democracy's Leader Argues Against Imperialism.

Towne Declares That the Monetary Question Is Still a Live Issue.

Lincoln, Neb., July 11 .- In two ratifiation meetings, one in the afternoon, conducted by the Populists and Silver Republicans of Nebraska; and one last evening conducted by the Democrats Messrs. Bryan, Towne, Weaver and other leaders of the parties outlined the work of the campaign in the interest of Bryan and Stevenson, it being the informal opening of the Democratic campaign.

At the afternoon meeting the speakers were Mr. Bryan, Congressman Shafroth of Colorado, "Cyclone" Davis of Texas, Webster Davis, Charles A. Towne and General Weaver. Mr. Bryan spoke last, and only in response to repeated calls. He paid eloquent tribute to Weaver, Towne and Dayis, former Republicans. "I simply want to say, now that the campaign is begun, so far as the ticket and the platform are concerned," Mr. Bryan continued, "and from now until election day it will be the duty of every citizen to take these issues before the country and weigh them. If we lived in a land where a king thought for us, we would feel no responsibility for the action of that king. But we live in a land where the people determine the policy. We live in a land where the itizen impresses his own opinion upor the government, where the policy of the government may be determined by the vote of one citizen.

It is antiseptic in character, as well as stimulating; its action upon the scalp and hair is truly wonderful, inasmuch as it has never been known in a single instance to fail to cure scalp diseases and to create a luxuriant growth of healthy, beautiful hair. It stops hair falling within twenty-four hours and brings back the natural color to gray hair in nearly every instance. It is not adve; it is not sticky or greasy; on the contrary it makes the hair soft, youthful, beautiful and glossy; keeps it in curl. It is a perfect hair dressing, and can be used by ladies, gentlemen or children as a daily toilet requisite. Its influence is delightfully soothing.

This nomination comes to you, sir, under circumstances which give it a higher significance and make it an even desper expression of honor and trust than usual.

You were nominated unanimously at the second second and the second second and the second second second and second expression of honor and trust than usual. You were nominated unanimously at Philadelphia. You received the inforced vote of every delegate from every state and every territory. The harmony of sentiment which appears on the face of the record was but the reflection of a deeper harmony which existed in the hearts and minds of the delegates. Without faction, without dissent, with profound satisfaction and eager enthusiasm you were nominated for the reserved for the same and minds of the delegates. Without faction, without dissent, with profound satisfaction and eager enthusiasm you were nominated for the profound satisfaction and eager en-thusiasm you were nominated for the presidency by the united voice of the representatives of our great party, in which there is neither sign of division nor shadow of turning. Such unanimity, always remarkable, the here the more impressive because it

ALL FOREIGNERS DEAD.

Last of Legations at Pekin Destroyed on the Morning of July 7.

Now Taken For Granted That Worst Has Happened.

Allies at Tien Tsin and Army East of Pekin

London, July 13 .- The Shanghai corre-

"The two remaining legations, the British and Russian, were attacked in force on the evening of July 6, Prince Tuan being in command. The attackers were divided. Prince Tuan commanded Prince Tsai Yin and the left by Prince Yin Lin. The reserves were under

Prince Tsin Yu. "The attack commenced with artillery fighting, which was severe and lasted until 7 o'clock in the morning, by which time both legations were destroyed and all the foreigners were dead, while the grinding pressure of air brakes, she streets around the legations were full of snatched the child from danger, but the dead bodies of both foreigners and

"Upon hearing of the attack Prince Ching and General Walg Wen Shao went foreigners, but they were outnumbered and defeated. Both Prince Ching and General Wang Wen Shao were killed.

"Two foreigners are said to have eseaped through the gates, one with a heavy sword wound in his head. Prince Tuan, in celebration of the victory, distributed 100,000 taels and huge quantities of rice to the Boxers."

A terrible veil of silence enshrouds Pekin, and there is nobody but believes the worst has happened. It is taken for granted that all the powers have exhausted every means to get direct news from their legations, and the fact that their efforts have been vain leaves but one interpretation.

The Chinese representative in Berlin denies the statement that Li Hung Chang had sent him a hopeful telegram. He says that, on the contrary, no direct telegram has been received by him from Li Hung Chang for some time past.

The day's news is again restricted to the usual crop of untrustworthy Shangnai rumors, the most serious of which, tions. The correspondent asserts that Captain Bailey of H. M. S. Aurora disrecting the Chinese military operations three miles into the city. It was imoutside of Tien Tsin.

Foreign refugees from Tien Tsin openly accuse a European official, whose name The Express correspondent suppresses, and Colonel Von Hannekin, who the sand away. was formerly employed to drill the Chinese troops, of being parties to a plot to procure the escape of General Chang and themselves from Tien Tsin before the bombardment, leaving the other Dustin Shaw was sentenced by Judge foreigners to their fate.

Statements are in circulation in Shanghai accusing the Russians of indiscriminate slaughter of friendly Chiage or sex. The manager of a Chinese steamship company, who has arrived in Shanghai, asserts that he only escaped from Tien Tsin by cutting off his queue and donning European clothes. It is stated that the taotal of Shanghai protested to the powers against these Russian slaughters.

It is asserted that the Buddhist priests throughout the empire are propagating Prince Tuan's anti-foreign gospel. News is circulating through the Yang Tse valley that General Ma has inflicted a crushing defeat upon the allies at Tien Tsin, and that the foreign army has been cut to pieces east of Pekin. The actual impotence for the moment of the allied forces naturally give color to these stories, with the worst results.

The Shanghai correspondent of The Express gives Tien Tsin advices to July 8, when the superior range of the Japanese artillery enabled them to relieve the Russians, who were hard pressed at the railway station.

CLOSE TO PRETORIA.

Boers Inflict a Severe Defeat Upon the Forces of Lord Roberts.

Captured Two Guns and Some Two Hundred Men.

No Possibility of Any Troops Being Spared From South Africa at Present.

London, July 13 .- Lord Roberts' dis patch, reporting still another unfortuate occurrence, throws a serious ligh upon the state of affairs in South Africa. There has been some comment recently regarding the virtual absence of progress by the immense army under command of Lord Roberts, but few could have been found to believe that the scattered Boer forces were able to inflict such a defeat so near Pretoria.

Instead of the surrender of all of the remaining Boers being imminent as recent telegrams had hinted, it seems they have been making a concerted attempt to surround or recapture Pretoria, with so much success that, in the region which was supposed to be pacified and in which no attack was expected, they succeeded in inflicting a serious defeat and capturing two guns and some 200 men. It is evident that General Botha has a considerable force, seeing that he is able to press Lord Roberts' lines at a half dozen points around Pretoria, from the springs to the southeast of the city northward to Middleburg and Durde poort and thence southward to Nitral's Nek and Krugersdorp.

Lord Roberts omits to give the name of the commander concerned, giving rise o the belief that worse remains to be old. Even if the mishap be not worse than his information at present implies, it proves that the situation is still serious, and that there is no possibility of any troops being spared from South Africa for China, but, on the contrary, that it will take a long time to clear the

country of the Boers. News has reached London that Lord Roberts has been suffering from a se-Dr. Francis E. Clark, in the chair. Report of Defeat of Rebels Near Pekin | ceed Mr. Dick. and Relief of Prince Ching.

Li Hung Chang Has Decided to Remain at Canton.

Chinese Said to Have Lost Three Thousand Killed Outside of Tien Tsin.

London, July 14.—The Belgian foreign office hears that General Nieh Si Chang has defeated the rebels near Pekin and relieved Prince Ching and General Yung Lu, who were trying to defend the foreigners. General Nieh Si Chang recently was reported as assisting in the attack on Tien Tsin, so that the story of the Europeans does not seem probable The scanty cable dispatches received

The United States In a Position to Speedily Accomplish the Work.

Washington, July 14.-An attempt has been on foot for some days to arrange between the powers now operating in China for an international cable conpecting the base of Chinese operations either with Shanghai, Port Arthur, Yokohama or some other point through which more speedy communication can be had with the outside world. The state, war and navy departments have all been parties to the conference, which has been conducted with a great deal of liplomatic secrecy.

Both the war and navy departments ave been figuring for months past on a trans-Pacific cable, and consequently have all the necessary information at their fingers' ends. The war department now has 50 miles of cable ready to ship to Manila, to be followed by 400 nore about Aug. 1. This was to have been used for interisland communication in the Philippines, but the urgency of the case may cause it to be diverted to

THREE DEATHS THUS FAR.

Now Believed That There Were Fifty Persons Hurt by Oil Tank Explosion.

Boston, July 14.-In the big freight yard at East Somerville, where occurred Thursday evening the terrific explosion of an oil tank car, attendant with fatal results, was a scene of destruction yesterday. Near where the explosion and fire took place there was but little else than a twisted mass of iron, charred timbers and wrecked cars. But a large gang of workmen of the Boston and Maine railroad were early on the scene with a wrecking train, and the debris was cleared away as fast as possible. It was feared that the morning hours would reveal the dead bodies of several persons beneath the freight cars, blown there by the force of the explosion, but

happily this proved not to be the fact. The list of fatalities now numbers three, the dead being: Joseph Hayden, 38 years, a call fireman on hose 1; Rufus Fellows, 18 years, single, and J. J. Callahan, 45 years, who leaves a wife and two children. All three men were terribly burned about the face and body.

It is absolutely impossible to state accurately the number of injured, as in addition to the 20 or more known to have been sent to the hospitals, more than that number received medical attention at various drug stores in the neighborhood of the fire or at their homes. The total asualties will undoubtedly number over 0. As far as réports have been received, all the injured are doing as well as can be expected. The financial loss will be about \$27,000.

A large number of workmen have been busy overhauling the ruins of the wrecked and burned cars, and they are well cleared up. It was feared that some bodies might be found under the wreckage, but this fear proved ground-

The awful force of the explosion and the intensity of the hear of the flames are evidenced by the scores of cars upon tracks adjacent, whose sides are badly scorched and blistered, although they were standing, in some instances, 100 feet away. The reflection of the fire was distinctly visible in Lawrence and Lowell, a distance of 26 miles.

To Be Davoid of Politics.

Chicago, July 14.-Regarding reports that the Grand Army encampment is to have a political aspect, Executive Direcor Harper said last night: "There is absolutely no politics in the coming national encampment. Never in the history of this organization has there been an annual encampment to which the President of the United States has not been invited as the chief executive officer of the nation. When the formal invitation was sent to President McKinley a similar invitation was forwarded to William J. Bryan. The president has accepted. Mr. Bryan almost immediately acknowledged the receipt of the Invitation, but did not give us a definite

Frol c Ended With Death. Providence, July 14.—Percy O. Redpath, 14 years old, died Friday from wounds made by a pair of scissors thrown at him during a boyish frolic be tween him and Michael Drumgoole, aged 18, while both were at work in the Banigan rubber works in Olneyville. Drum-goole is under arrest. The latter was cutting a sheet of rubber, which Redpath was sponging. Redpath playfully shook water from the sponge in the face of Drumgoole, and the latter, in the same spirit, says he made a sweeping pass at Redpath and the wet scissors flew from his hand and penetrated Redpath's abdomen

Saving Bank to Be Wound Up.

Nashua, N. H., July 14 .- Judge Parsons of the Hillsborough county supreme court has appointed George E. Bales assignee of the Wilton Savings bank in the town of Wilton, and the affairs of the bank will be closed up as soon as the western securities held by the bank can be disposed of. In 1898 the bank stopped receiving deposits, but since then the trustees have been able to pay the depositors 60 percent of the amount due them. The appointment of an assigned was decided upon by the trustees as there seemed to be little hope of the bank pening its doors again.

Strikers Are Homeless.

Pittsburg, July 14.—Between 25 and 30 evicted families have been encamped in an orchard just outside of Preston. Of the numerous children belonging to the camp one is dead and another is dying. The men of the evicted families were employes of the Pressed Steel Car company, and have been living in houses at Preston owned by the Fidelity Land company, an adjunct of the car company. Two weeks ago the men went on strike and now they claim the eviction is the result. The company claims the men were discharged for inciting riot.

We have never had much to say about Tea, because we have always been very particular in selecting Teas and almost all our regular customers buy their Tea of us, besides some others, now we are confident that if you will take one of our samples of Oolong Tea that we sell at 50 cents per pound you will find a nice flavored tea, one that is actually good enough for anybody to use.

Our English Breakfast that we sell for 50 cents per pound has a particular flavor that we find pleases and we always select that flavor.

We know that most Grocers have a habit of saying that the Tea they sell for 50 cents is worth 60 or 75 cents a pound. We will not say exactly that but if you are paying the high price shall look for an order for a pound. Other prices, 40c., 60c., 75c. a pound

The task that teachers have to perform in Caba is at once most difficult and inspiring. Illiteracy and ignorance are as general as in the most backword communities of our country: the mateials for teachers is not plenty and there are but few that have any real preparation for their rrofession; the revenues of the island do not permit adequate pro vision of buildings and apparatus, and everything is necessarily in a primitive stage. On the other hand, there is great and eager desire for schooling in all classes of society, and it is the most ardent in the classes that have had the least advantages and now have the greatest need. The children are reported to be peculiarly docile and interested and they have the most cordial encouragement in their homes. The influence of the parents is steadily and earnestly on the side of the teachers. The field for work therefor, in Cuba is an extremely promising one, calculated to enlist and repay the most faithful service.-New York Times.

THE FAMINE IN INDIA

BY JUSTIN E. ABBOTT OF BOMBAY.

EIGHTEEN YEARS RESIDENT IN INDIA. A famine the most widespread and severe of this century now darkens

the whole of western and central India, an area equal to New England, New York, New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Michigan and Wisconsin. Sixty million people are involved, of whom probably 10,000,000 will perish unless aided. The living skeleton is the indisputable evidence that the resources of the people are exhausted. Along the highways, in lonely

SKELETONIZED BY FAMINE.

passes, by stream beds that give no hope of water, weak and emaciated human beings are falling and dying by hundreds daily. Great numbers who reach relief camps are past help, and the very food they ravenously eat kills them. Children, orphaned or deserted, are picked up by scores as they wander. Terrible tales are told by eyewitnesses of these helpless little ones be-

ing devoured by dogs and jackals

"WHAT WILL YOU DO WITH ME?"

[Famine girl not too far gone to save.]

The cause of the famine is the failure of the monsoon rains from June to October last year. The farmers, who number 80 per cent of the population, were already impoverished by the famine of 1897. Expenditure of every kind was stopped; hence the laboring class and artisans have had no work. The British government is relieving the situation by gratuitously feeding the infirm, the aged, the emaciated and the children. The ablebodied are employed on cash wages in building reservoirs and irrigation works, railway embankments, roads, etc., which will greatly mitigate future famines. About 6,000,000 are now in daily receipt of official relief. Connected with the camps are hospitals where those in the extremes of emaciation are nursed back to strength. The death rate is by far the greatest in the native states where government control is least. Here, lowever, the government is assisting by loans of money and of the services of experienced officers. Already the authorities have spent \$47,000,000.

With the failure of crops in the famine area there began a flow of grain from other parts of India and other countries. From Burma alone there was imported in ten months 427,000 tons of rice, worth \$70,000,000. Merchants have carried grain everywhere, and the price has remained fairly uniform at a cost only twice that of ordinary years. There are millions of people, however, who have no money and

no work. It is these moneyless millions for whom help or death is the only alternative.

In spite of all that can be done by the government there is a vast field for the private charity now being so splendidly supplied by America. Britain and her colonies and various European countries. Doubtless the most efficient agency for distribution of this private benevolence is the body of several hundred American and European missionaries located in the famine districts, whose experienced services are freely given to this work of humanity Missionaries supplement official efforts by assisting as many as possible to reach relief camps. Those too weak for the journey, unprotected young women, mothers with children and deserted orphans, are given refuge and tender

CHRISTIAN ENDEAVOR.

Topic For the Week Beginning July 15-Comment by Rev. S. H. Doyle. Topic .- How mission work will gain success.-

Acts i, 6-14. (Quarterly missionary meeting.)
The success of mission work in the past is a guarantee of the success of mission work in the future. All has not been done that we would like to have seen done, but much more has But Ten Companies Required been done than many imagine. Christianity has been tremendously felt in the whole civilized world. Christianity rules today in the rulers, laws and institutions of the nations which control! and govern the earth. The poetry, philosophy and science of the world are and have been predominantly Christian. The grain of mustard seed has become a great tree, the little leaven has leavened the whole lump, and the stone has become a great mountain that is filling the whole earth. What has done it? What has been the secret of missionary success in the past? The answer to these questions will solve the problem of missionary success for today, and they are answered by Christ in this passage from the Acts. Two essential elements of missionary success are pointed out-(1) divine power Christ to the world. The early church was a remarkably successful missionary church, and its success was based upon these two elements. So it must be today if missionary effort is to gain

1. Divine power is necessary to missionary success. "Ye shall receive power after that the Holy Ghost is come upon you." The apostles waited at Jerusalem until they received this power of the Holy Ghost, and then they went forth and preached Christ with great success. The most essential element of successful mission work is the power of the Spirit. It is absolutely impossible to gain success without it. There are other things that are very necessary, such as wealth, organization, knowledge, but these are all secondary to the one great essential quality of spiritual power. Paul had no wealth, no great organization but he had divine power, the power of the Spirit, and with that he was the most successful of missionaries. In mission work, of all work, it is not by might or by power, but by the Spirit of

2. Human effort is necessary to missionary success. "Ye shall be witnesses unto Me." Divine power is to be coupled with human effort. We are to be colaborers with God. God is to supply the power. Man is to be the channel through which the power is to be transmitted and diffused. It should be a delight and an honor to all men to bear witness unto Christ through the power of the Spirit. Let us do it faithfully both at home and abroad, at Jerusalem and in Samaria. Sincere human effort put forth in the power of victory over the Midianites, and it can win the victory over sin, unbelief, idolatry and heathenism and can win the world for Christ.

The Helpful Church Member.

Just what the good, helpful church member is in church he is at home. with an open heart and an open hand, never content unless his friends are coming and going, never angry unless they will not stay and have a meal with him, never so full of joy as when he is doing a good turn or going over old days with those to whom he is bound by a hundred ties of kindly words and deeds. As he has dealt with all men, strangers and friends alike in his church and in his house, so will God deal by him, and for him we may feel sure there will be a hospita- are cheerfully accepted." ble welcoming waiting where the churches of earth have changed into our Father's house.-Ian Maclaren in February Ladies' Home Journal.

The Cure of Loneliness.

Selfishness is one great cause of loneliness. If a man builds walls around himself, so that he may keep all that he has to himself, he soon finds that he has built walls around himself which shut out all that might come in to him from others. So the cure of loneliness may be the overcoming of selfishness. The medicines far this disease of loneliness are potions of generosity, of thoughtfulness for others, of self sacrifice, taken in large doses. Even when the loneliness comes from the bifferness of loss and sorrow, forgetting self. going out of self and doing for others, is the only cure that God has given on earth for its healing .- Sunday School Times.

God's Due.

Our time is due God. Few of us devote enough of our hours to distinctively Christian service. An honest investigation of the amount of time that we spend in private worship in God's house and in his work will surprise us and humiliate us, too, when we contrast it with the time we devote to selfish and secular ends. Not many of She is in a perilous position. us are tithers of our time.-William T. Ellis.

Innocence.

One source of spiritual strength is the consciousness of innocence; that motives are sincere, thoughts clean, desires pure. Tennyson is not always to be followed, but forceful is the statement of his Sir Galahad, "My strength is as the strength of ten, because my heart is pure." The blood of Jesus Christ alone cleanses, purifies the heart.-Episcopal Recorder.

IS RUNNING SMOOTHLY.

Civil Government Is Proving Beneficial In the Islands of Negros.

to Hold the Place.

American Methods Have Done Much Toward Pacifying the Natives.

Boston, July 14.-Lieutenant Harry F. Dalton, U. S. A., who is the adjutant general of the third district of the Visayas, Philippine islands, has written a letter from the city of Bacolod, island of Negros. It contains some interesting facts connected with the government of the island and its people. The following is an extract:

"The island (Negros) is gradually assuming a more peaceful aspect, and there has been no disturbance of note and (2) human effort in presenting since the uprising of Dec. 2 last, which was nicely nipped in the bud, but in which we lost Lieutenant Ledyard. It is necessary, however, to keep both eyes wide open all the time. Our principal trouble comes from small bands of Tulisanes, who operate in the foot hills and mountain barrios, making it necessary to send out from 20 to 50 men every few days.

"The conditions which prevail are very similar to those found in the west when the Indians kept our troops continually busy. However, there is no longer any organized insurrection on this island. We have here now only 10 companies of the Sixth infantry. This proves a sufficiently strong force, for one American soldiers may be reckoned as the equivalent of several Filipinos.

"I have been appointed inspector of the civil prison here, and I am introducing American methods of management, having drawn up a set of rules and regulations and intend to set the prisoners to work in various ways. The inmates are bandits and murderers, many of them Negritos. The establishment was in very bad shape, but is now greatly improved, indeed, nearly a model in my opinion as regards system, regulations and cleanliness.

"We have a prison hospital, a system of labor and of payment for the same, a guard of 24 men, one-half Americans, one-half natives. The prison furnishes about 100 men every day for various kinds of work in the town, and we also have 89 men with the signal corps building telegraph lines all over the island. Inside, the prisoners make hammocks, taskets, fish nets and poles, while outside they build houses, sheds, fences, bridges, etc.

"All towns in the island are being prepared for the rainy season; ditches have the Holy Ghost will make missionary been dug, wells cleaned and deepened, success absolutely assured. "The sword and all kinds of work undertaken which of the Lord and of Gideon" won the will conduce to health and comfort durng the next four months. All this American enterprise impresses the na tives forcibly

"The civil government of Negros is running smoothly under General Smith's watchful eye. The officials, while not Use the United society's special pro- educated, have only the vaguest ideas gramme or let one be arranged by the concerning self-government, and if left They know nothing of drafting laws, and have to be taught like children. Besides. they have been brought up in the Spanish schools, where the rule was to devote all moneys to the payment of salaries, nothing being left for public works

and improvements on the island. "This accounts for the lack of schools, roads, bridges and railways. As an example, one town on the island submitted its estimates for the ensuing year's receipts and expenditures, and out of \$800 to be raised by taxation \$300 was to be spent for town purposes—the rest for salaries, and this in a town of 6000 people. It goes without saying that General Smith promptly disapproved the estimate and practically reversed the amounts. This is only one instance among many, but as the military governor is the right man in the right place and as the civil authorities are wel neaning, if unexperienced, his decision

FUTURE OF PORTO

Governor Allen Enthus Over Its Vast Opportuniti

AN IDEAL PLACE FOR ONE'S I

Sugar, Not Coffee, to Be the Crop of the Future-Miles of Soil In Sugar Belts Waiting Man-Tobacco the Poor Man's tlook For Oranges.

The Hon. Charles H. Allen, civi ernor of Porto Rico, arrived at York recently on the United auxiliary craiser Mayflower, mander Duncan Kennedy. The flower dropped anchor off Tom ville. Governor Allen was put a and went immediately to the Manhattan, where Mrs. Allen waiting for him.

Governor Allen is a self conta long headed New Lingland man turer. About his own work on th land and upon the political situ he will say little or nothing. In his remarks on these two subjects be summed up in the following an to a question put to him by a York Sun reporter the other even "Of my own work others must sp As to the political situation in I Rico, it speaks for itself." Of the ural resources of the island, of territory as a place to make one's h in, of its material prosperity and possibilities of its development, (ernor Allen spoke unreservedly enthusiastically. Among other th

"Porto Rico as a place to live i deal. Its climate is healthy and lightful. The summer time in that le island is something to live for a once experienced, is something to the of when far away from it. In ities it is hot, but what American sn't hot in summer? In the me ains, which are within easy reach he important cities, one needs to sl ander blankets to be comfortable, a night in the mountains will give rigoration enough for two or th days' hard work in town.

"Speaking commercially, business pooming in Porto Rico-that is to sa t's booming as much as somewl imited capital will permit. Heret fore the principal crop of Porto Ric has been coffee, but this has been, as must continue to be, the rich man crop, since it is impossible to grow co fee without capital. Up to this yes offee has furnished about six-tenth of the revenue of the island. It wi furnish nothing like that amount th year owing to the hurricane. While that did a lot of damage to the coffee bushes, stripping them of leaves an berries, it acted as a great prune stripping from the bushes a grea amount of dead wood which should have been cut away years ago. The re sult of this pruning by the winds ha been that the coffee bushes have taken a new lease of life, and they are grow ng more luxuriantly than ever. Nex year there will be a famous crop.

"But coffee will not again be the great crop in Porto Rico. Since the ans have occupied the islan the Porto Ricans have found that the an get out of old beaten paths and not get lost, and they can do thing hat their fathers never dreamed loing and yet not die of nervous pros ration. As a result, they are now iving more attention than ever before the cultivation of sugar and tobacc And sugar is to be the great Porte tican crop of the future. It didn't tke our friends long to appreciate the dvantage of growing sugar under the ew tariff law. When they found that ey could make about \$37 a ton in gold by growing sugar under the new tariff, they concluded that it would be a fine idea to grow sugar.

"There are two sugar belts on the island, one along the southern shore and one along the northern shore. Each belt is about 100 miles long and five niles wide. I have no idea how many acres either of these belts contains, but do know that there are thousands and thousands of acres which a spade as never yet touched. As our people earn more about that island, its clinate and its possibilities, they will take aeir capital down there to invest it in igar plantations, and sugar will beme the great crop of the island.

"Then, too, the cultivation of tobacce is been undertaken on a much larger scale than ever before. This is the ooor man's crop. It requires little or no capital to grow tobacco. The plant equires no cultivation. Just give it a chance, and it will attend to its own business and grow just as if the future of the island depended on its growth. A native can plant an acre of obacco and make a living from his product. And, let me tell you, it's good acco, and the cigars made from it e mighty good cigars. They are just good as any eigars I have ever been e to get in Cuba. To be sure, the rice of the cigars and the tobacco has ne up somewhat since we have been occupation, but you can still get a Il made cigar of the finest tobacco about 3 cents, American money. "But there is still another crop which

being developed down there, and t is oranges. You know an orange p in Porto Rico is never ruined by sts. Well, several Florida men who re had sad experience with frosts in Indian river country and elsewhere Florida heard about the no frost inters in Porto Rico, and they have ne down there and started orange oves. The Porto Rico orange is delous, sweet and juicy, but it has a ph ood many seeds. These Floridians have taken grafts from the orange es along the Indian river and are w budding the Porto Rican trees, nd they expect to secure an excellent Quality of fruit by this process."

The Robin's Concerts

BY FRANK H. BROOKS.

An Actual Occurrence.

When the first days of spring came in Washington, a tree in one of the little By the publication of the July governparks, of which there are many in the ently become known as to the situation city, whitened with bloom nearly two in wheat, and unquestionable improveweeks before there appeared any buds ment since July 1 has led to the belief or verdure on the other trees or shrub- that the crop damage talk, as usual, has bery. There were no leaves on the tree been exaggerated. The month of June which bloomed. The biossoms swelled and burst their petals on the branches vances in many lines of agricultural until they looked like a summer cloud.

Fronting on this park is a home in which a sick child had lain for weeks and weeks. She was nursed by one of products, the result being a virtual the old black mammies so numerous in the national capital. As the sunshine became warmer, so that the window in the room of the sick child could be raised at certain hours, the child asked the old mammy to push her white bed near the window, and it was by this open window the old mammy sat and held the child's

hands as she told her this story:
"Honey, dat tree dat look so like de tton in my ole home is what dey call de Japanee magnoli. It doan' got no lebes on it, honey, like de magnolis in Dixie. An de dently looked for. In addition, railroad good man want you, my honey, to see dat on dat tree my honey cudden see de robin redbreast. Dat's why. An de robin redbreast he gwine to sing fo' you, honey,

A few days later, while the sun was shining warm and flooding the room, the old mammy moved the white bed to the window and raised the sash. And a robin, with breast as rich as cardinal, lighted on a branch of the Japanese magnolia and sang until its notes filled the tree of bloom and all the little park. It was in the morning. After a little while the robin took its flight, and the window

sash in the sickroom was lowered.
"Honey, what did I done tell you?" said the old mammy as she tucked the coverlets about the sick child.
"Dat wuz fo' you, honey. De good

As before stated, the improvement is still one of tone rather than of actual demand, but with, as seems probable, a yield of 540,000,000 bushels of wheat, a next to record breaking yield of corn and a very large production of oats, the western crop situation contains many ncouraging features.

The southern cotton crop has undoubtedly suffered and condition is unpreearnings point to the maintenance of the robin redbreast, an so he doan' put no business of the country at a volume in lebes on de tree. Kase if dar wuz lebes excess of last year.

The effort of the big fron and steel oncerns to control prices, if really made. has proven abortive and another wholesale slashing of quotations is to be reported this week. Production, however. is falling off.

The industrial situation is rather better, as a result of agreements upon wages by a number of iron and steel manufacturing concerns and their employes. Wheat and flour prices are slightly ower on the week in keeping with improved crop reports at home and abroad, but corn has been in exceptionally good demand and is at the highest price reached for years. Hog products are in

rather slack demand. Business failures for the week number 22, as compared with 25 last week, 27 in this week a year ago, 28 in 1898, 33 in 1897 and 33 in 1896.

For Immediate and Concerted Action In Dealing With China.

No Doubt but That Foreigners In Pekin Were Killed.

Allied Forces Succeed in Routing the Enemy In Engagement at Tien Tsin.

London, July 16 .- The following is the ext of an appeal of Americans in China, assembled in mass meeting at Shanghai, to their fellow citizens at home:

"Urge the government to send adequate forces to act effectively in concert with the others. At present the American forces are quite disproportionate to the interests involved. Our commercial interests in the northern provinces are paramount, and we consider it a humiliating policy to entrust to other powers the chief task, that of protecting

"And foreign ourages are multiplying daily. Officials and missionaries are massacred. The fate of the ministers and their families in Pekin is not known, but a general massacre is apprehended. Wholesale massacres of native Christians continue. The whole country is errorized. Trade is paralyzed.

"The speedy restoration of order and retribution are duties pressing upon all civilized powers. The consequences of lelay will be disastrous. Not only are foreign lives and property placed in jeopardy, but the loss of influence will be

"Give no credence to statements of the situation sent by the Chinese government to its ministers abroad. The present outrages are the result of the weak and vacillating policy of the powers in the past. We urge immediate, energetic and concerted action."

It seems impossible to entertain any longer the least doubt as to the fate of the Europeans in Pekin. The Associated Press learns that Lady Hart, wife of Sir Robert Hart, director of the Chinese maritime customs, on July received the following message from her husband: "Our people, including the women, are in the legations. Prepare to hear 'he worst."

The European governments have reeived from their representatives at Shanghai a dispatch from the governor of Shan Tung, dated July 7, reporting that the European troops made a sortie Tung Fuh Siang's forces, and that the oxers were mounting guns to make a reach in the defenses.

Under date of July 10 the governor of soldiers and Boxers have been attacking the legations for some hours, but have not yet effected an entrance. They are now all bombarding with large cannon Finally came the news from Shanghai that a breach had been made and the foreigners killed. All the dates probably refer to a much earlier period; but the presumption is that the successive dispatches give an outline of what has hap-CUSTON TAILORS, pened. The Europeans, having reached the end of their resources, made a desperate sortie and then bravely met their pened. The Europeans, having reached fate. The details of the horrible story will probably never be known.

The Shanghai correspondent of The Daily Mail says: "I can assert positively that the Chinese authorities had the dreadful news from Pekin a week ago, and Sheng knew all the foreigners in Pekin were dead when he asked the American consul to cable to Washington a proposal to deliver the foreigners in safety at Tien Tsin, on condition that the allies would suspend their operations to the north of Pekin."

Admiral Seymour's dispatches give the latest news regarding the situation at Tien Tsin. Telegrams to the Associated Press show that the operations on July 11 were a brilliant success. The Japanese cavalry and a mobile mounted battery did splendid work. It was unfortunate that the allies did not have more cavalry to pursue the flying enemy. Four hundred Chinese were killed and six guns captured. At noon the settlements were again victously shelled from the native city and the hospitals and other buildings were repeatedly hit. The moral effect of the successes of the allied forces upon the Chinese is believed

o be very great. General Gaselle and staff, with a force of Punjab infantry, arrived yesterday at Hong Kong and proceeded for Taku. The French consul at Shanghai, at a reception Saturday, made an impassioned speech. He said: "The history of the world can show no parallel to such the mere thought of which makes us shudder, has been perpetrated, then it is our desire that swift and summary punishment shall fall upon the perfidious nation which committed it. Our government is fully aware of the danger in you that we are doing all in our power to avenge the noble victims of Chirase

Canton dispatches say that Li Hung chang had planned to start for the north on July 18, but he is much debiliated by catarrh of the stomach. He ordered the leader of the "Black Flag" march with 50,000 men overland to Pekin against the Boxers.

No Walkover For Beckham.

Lexington, Ky., July 16.-The Demo cratic state convention will meet here on Thursday. Present indications are that there will be a lively contest for a successor to the late William Goebel: Governor Beckham is strongly in the lead, according to the returns from the county conventions of Saturday, but it is denied that he has a majority, and it is stated the field will combine against him. The field includes Messrs. McCreary, Tarvin, Black, Lewis, Smith and Garnett.

A TINGE OF MYSTERY

In Connection With Death of Mrs. Natalie Mayer, a Prominent Society Woman.

New York, July 16.-Mrs. Natalia Mayer, wife of John Mayer and eldest daughter of the late Theodore Have-meyer, died in the Havemeyer mansion in the Mountainside Farm, near Mahwah, N. J., late Saturday afternoon Little definite was known concerning the cause of death until Sunday, when Commander Winslow, U. S. N., who is married to a sister of Mrs. Mayer, gave out the following statement:

"Mrs. Mayer died from the effect of a pistol shot accidentally fired. The wound was not at first believed to be fatal. There will be a coroner's inquest in accordance with the law."

On Thursday last, according to the New York Press, Mrs. Mayer went to Newport to attend the wedding of Henry O. Havemeyer Jr., her brether, wh married Miss Charlotte Whiting. She returned home on Saturday from the wedding. That was the last seen of her by her neighbors. She was then in her carriage, being driven from the station

to the Mayer home. The publication of the list of guests at the wedding was a surprise to some of the friends of Mrs. Mayer. Her name Athletic club upheld his reputation and given out at the house. The name of her husband was there, along with many names reading "Mr. and Mrs.," and then came the name of "Mr. John Mayer." It may have been an oversight, but it was commented upon. When she drove up from the station those who had read the list of guests said she had been to the

To Head Ticket of Gold Democrats and the Anti-Imperialists,

Call For a Conference on the Third Party Movement.

Unsuccessful Efforts to Gain the Interest of Thomas B. Reed In the Matter.

New York, July 16.—To afford a place of political refuge to those Democrats who are unalterably opposed to free silver and to those Republicans who refuse o accept the imperialistic policy of the McKinley administration a third party is developing. It is now practically asplaced in the field.

Influence is being brought to bear to persuade former President Cleveland to lead the new movement and to head the third ticket as a candidate for the presidency. His approval has not been obtained, and his friends believes that he will insist upon his right to remain in re-

Mr. Cleveland is classed as a Gold Democrat, and to him has been sent a copy of a call for a meeting to be held in this city next Wednesday. As yet his reply has not been received. Those most interested in the movement hope that the former president will at least consent to give to the public a letter, such as he well knows how to write, which may be used as a campaign document A copy of the call which has been sent to Mr. Cleveland and to other Gold Democrats and to the anti-imperialists follows:

"The alternative of voting for McKiney or Bryan confronts many thousand thoughtful citizens who are oppose o both candidates. The voter who can not bring himself to indorse either the leader, died at Philadelphia, aged 57.

Mr. Chance was a printer by trade, and self practically forced from the polls on election day, unless some organized efof the International Typographical fort is made to enable him to express his political convictions.

From Che Foo comes the report that the entire adult male population of the three provinces of Chi Li, Shan Si and Shan Tung are massing to defend Pekin in the conviction that the powers mean war. There is little doubt that a further check of the allies at Tien Tsin would be the signal for a general antiforeign rising throughout China.

The Japanese officers are still confident of their ability to reach Pekin before the roads become impassable; but the European commanders believe an advance will be impossible before September. Fighting is said to be imminent at New Chwang, where the Boxers are threatening the foreign settlement. The Russians have barricaded the streets and loopholed the houses of the foreigners. first and only remedy known to chemical science found to be a genuine hair specific. It has an affinity for the human hair for nourishing and incharacter, as well as stimulating; its action upon the scalp and hair is truly wonderful, inasmuch as it has never been known in a single instance to fail to cure scalp diseases and to create a luxuriant growth of healthy, beautiful hair. It stops hair falling within twenty-four hours and brings back the natural color to gray hair in nearly every instance. It is not adve; it is not sticky or greasy; on the contrary it makes the hair soft, youthful, beautiful and glossy; keeps it in curl. It is a perfect hair dressing, and can be used by ladies, gentlemen or children as a daily toilet requisite. Its influence is delightfully soothing.

In the second round Erne broke ground everal times, but always came back with a dangerous left or right for Terry's head. The fighting was so fast that it was impossible to keep track of the lows, but Terry landed three blows to Erne's two. In the clinches, which were frequent in the round, both men were guilty of holding, and McGovern was cautioned by the referee. Towards he close of the round, Terry put a hard ne over Erne's heart and a stiff right

on the body, which weakened Erne. In the third round, which proved to be the last, Terry fought faster than ever. When he floored Erne for the first tim it looked as if the latter would not b able to resume hostilities, but he aros to his feet fairly strong, and tried t off-set McGovern's advantage. It was floored him once more with a blow on nereabouts in a long time. About 20 the jaw and a left over the heart. A THIRD PARTY TICKET

To Be Placed In the Field by Anti-Imperialists and Gold Democrats.

Adoption of Address Severely Censuring McKinley.

Says Bryan Used His Influence to Ratify Imperialism Which He Now Denounces.

New York, July 19.-A number of gold Democrats and Anti-Imperialists met in canvas up. this city last night to discuss the methods of bringing a third party ticket beore the public

Thomas M. Osborn of Auburn was nade chairman and Isaac Klein, secretary. Mr. Osborne explained that the meeting was called to put a third ticket in the field for he presidency, "that the opponents of McKinley and Bryan should have something to fight for, instead of against.'

The following is the text of the address, which was adopted after much foot. Sagwa, another leading candidate

We are met to devise means to place n nomination a third presidential ticket. betting ring. We take this course because we are at present faced with the necessity of choosing between the candidates for neither of whom can we conscientiously

On the one side is Mr. McKinley, who by his weak and vacillating conduct, has involved this country in a war of con uest in distant islands against a na turally friendly people. His policy of benevolent assimilation." proclaim nonths before the treaty purchasing the Philippines passed the senate, was not only brutal, but unconstitutional. We have seen the principles upon which the United Stat's government was founded and to which it owes every claim to the espect of mankind, disregarded. We have seen the form of the commercia yndicate arise behind the executive and entrol his acts and utterances.

We cannot forget the scandalous appointments which show the debauching of the civil service and the lowering of the standards of the federal judiciary for both of which the president is direct responsible.

At McKinley's side stands Roosevelt the frank embodiment of militarism, eager for the country to shoulder more burdens by foreign conquest.

for a tariff under which the trusts flourish uncontrolled. It stands for a steamoutdo any previous raid upon the United will be counted as a vote for imperial- to have come from Nome.

On the other side is Mr. Bryan, the nan who at the crucial moment used his nfluence to confirm the Paris treaty and thus ratified the imperialism which he now denounces. Mr. Bryan is a man of hallucinations or a demagogue-in either vent a dangerous man, lacking the qualities of statesmanship necessary to ope successfully with the difficulties he yould inherit. A vote for the Democratic ticket means a vote for free silver: it neans a still further debauching of the civil service, a packing of the supreme the executive.

The Republican party has fallen under control of commercial forces and has for many years been used to make its controllers rich. The Democratic party ap peals to the laborers by the same prom ise-that it will make him rich. Both parties are now frankly selfish-run in the interests of certain classes and individuals.

Bryanism is itself an outcome of 4 years of Republican rule; for disorganized fanaticism is always the oucome of intelligent, protracted organized corruption.

Meanwhile every election multiplies the number of voters who become independents by revolt.

There are offended by injustice and dishonesty in their own party and wish to rebuke it by voting for the opponent. Experience has shown, however, that such a rebuke does not effect a reform in the party abandoned, but merely absolves its opponent from the need of reform. By this process the political power of right-minded men has beeduced to a minimum; for their a lyity has been perpetually negatived by this process our politics have sunk to their lowest level. The disinterested voter has become a mere onlooker at a degraded game. His chief thought is how to cast his vote so that it may do the least harm to his country.

The independents among us have been powerless because they have not been ndependent. To be effective they must vote for independent candidates repre senting positive principles and not mer negative protest

We cannot therefore give honest support to either candidate of the great parties. We reject the plan ordinarily uggested of making a choice of evils as the long run unwise and ineffectual. We believe that political action based or ordinary principles of right and wrong s neither useless nor unpractical. Therefore ask others to join with us in

he support of candidates upon some uch platform as follows: First-A return to the political doc

trines of the Declaration of Independence and the constitution. Second-The recognition that not only

Rico and Hawaii are independent. Third-Genuine monetary reform.

Dr. Louis Klopsch, proprietor of The Christian Herald, who has been in India superintending the distribution of the supplies and food purchased for the relief of the people in the famine districts with the money of The Christian Herald relief fund, arrived in New York on the Hamburg-American steamship Pennsylvania. In speaking of some of his visits in India he was particularly impressed with the efforts of the government to relieve distress and how these efforts were often futile. Poorhouses, hospitals and relief camps under native management were frequently found; in a state of criminal and sarah form the power of sale contained in all round workmen. I had the women carried in and placed under shelter. "The explanation of the apparent

carelessness of the attendant was that the poor things were low caste women, the inference being that they were not worth caring for. They were treated as if the officials had a grudge against them because they did not die fast enough. The manner in which these poor people were regarded by the native attendants was indicated by one instance. Regarding a man who was nnected with parlor by sliding doors in the death throes, I asked how long it and ornamented by a staircase built of would be before he died. 'Oh,' said the attendant, 'he should be dead in ten The house is trimmed throughout with minutes, but he may live half a day.'

The country around was depopulated, and the trees were lopped of their branches for fuel. The relief camp at Viramgaum I also found to be in good condition. I visited this place on a Sunday, and the people gathering around the carriage I took the opportunity of addressing them through the medium of an interpreter. I told them that they ought to be thankful for what the government was doing for them. I mentioned that American sympathy for them had been aroused and if they would only hold off a little longer relief on a gigantic scale would surely come across the waters to them. and this, with what the government was doing, would soon relieve their distress and give them a fresh start in life. I also visited the hospital at Viramgaum, inspecting the smallpox and cholera wards, and found everything in excellent order. A few weeks before the hospital had been in a deplorable condition, but a Christian missionary had been permitted to try his hand at it, with the result that there was a has a soapstone wash tray, a galvanized great improvement. first and only remedy known to chemical science found to be a genuine hair specific. It has an affinity for the human hair for nourishing and invigorating its entire structure. It is antiseptic in character, as well as stimulating; its action upon the scalp and hair is truly wonderful, inasmuch as it has never been known in a single instance to fail to cure scalp diseases and to create a luxuriant growth of healthy, beautiful hair. It stops hair falling within twenty-four hours and brings back the natural color to gray hair in nearly every instance. It is not ad ye; it is not sticky or greasy; on the contrary it makes the hair soft, youthful, beautiful and giossy; keeps it in curl. It is a perfect hair dressing, and can be used by ladies, gentlemen or children as a daily toilet requisite. Its influence is delightfully soothing.

IN CHING'S PALACE?

Speculation as to Safety of Members of the Legations at Pekin.

All Our Available Forces Will Be Rushed to China.

Whether and Where to Strike.

Washington, July 19.-Administration officials and others in Washington are suspicious of the statements contained in the Brussels dispatch saying that the is accurate, but they are disposed to accept it. like much other information coming through Chinese sources, with marked degree of reservation.

If it is correct that they are safe i Prince Ching's palace that is a cause for congratulation, for the prince is well known to be pro-foreign in his ideas, and his influence in Chinese affairs up to a recent period has been paramount Recent information from China has been to the effect that he had organized a ounter revolution to that conducted by Prince Tuan and had engaged the re bellious forces in Pekin. At one time he was at the head of the foreign office. A short while after the counter revolution broke out the report came that Prince

Ching had been killed. The understanding of a well-known diplomat here is that the secretary of the Belgian legation in China, whom he knew very intimately, was at last acounts in Pekin, which in his mind threv an additional element of doubt over the ccuracy of the report coming from Brussels. At the same time it is admitted he might have been at Shanghai on some business of the legation.

The statement that the legations had plenty of provisions on July 1 is at variance with that contained in a dispatch received at the Japanese legation here yesterday from Tokio transmitting a report from Baron Nishi, the Japanese minister at Pekin, and of whose accuracy there seems to be no doubt. This said that the foreign ministers considered it of the campaign, says that the campaign mpossible to procure provisions after

W. W. Rockhill to Represent United States In Gathering Information.

Chaffee to Command American Militia Forces In China.

Is Promoted So That His Rank Will Be Commensurate With His Command.

Washington, July 20 .- W. W. Rockhill, director of the bureau of American republics, has been appointed as special commissioner from this country to go to China and investigate and report upon he situation.

The cabinet at its meeting yesterday at the earliest possible day, which will without difficulty. probably be by the transport leaving Seattle Aug. 1.

Other than that the cabinet discussion vas mostly upon speculative questions. A dispatch came from Admiral Remey, which was read, but no change of policy program is made desirable by it. For some reason the officials did not

re to have it known that Mr. Rockinal conference with the president and ecretary Hay, and then will leave for hina. He probably will go to Vanouver, and there take the Japanese line steamer for Yokohama, proceeding from that point to Shanghai. Not until he arrives at Shanghai will Mr. Rockhill indertake to outline his future course His position is a peculiar one; he will be tually an ambassador in powers, and o in the scope of his functions will be kin to President Cleveland's paramount commissioner to Hawaii. Mr. Blount.

The president yesterday appointed rigadier General A. R. Chaffee, U. S. who is to command the American nilitia forces in China, a major genera of volunteers, in order that his rank hould be commensurate with his command. This action was received with great satisfaction at the war department and in official circles generally where General Chaffee is held in the highest esteem. He is considered by his brother officers as one of the most ca-

in the service with the promotion of General Chaffee His recommendation was made on the by balloon. ground that the services called for required an officer of the rank of a majo general, and he named General Bates for the reason mainly that General Chaffee held only the rank of a briga-

dier general. Adjutant General Corbin has sent a cable message to General Chaffee notifying him of his promotion, and he will eceive the telegram on his arrival at Nagasaki, about the first proximo.

A cablegram was drafted which will be forwarded to reach General Chaffee on his arrival at Nagasaki. These instructions are of a diplomatic as well as of a military nature, and indicate the line of policy to be pursued by the commander of the United States forces in China. The exact nature of the instructions was not disclosed, but it can and had collected a large quantity of on a junk and burned them. be stated on good authority that they follow the same line of policy that already has been outlined in statements from the state department.

The rank of major general for the commander of the Chinese expedition will necessitate the presence of two or perhaps three brigadier generals in China. These in all probability will be now in the Philippines, but General Chaffee will be given considerable latitude in the selection of his staff.

REGATTA ON THE HARLEM.

Interesting Aquatic Events Were Witnessed by Ten Thousand People. New York, July 20 .- Fully 10,000 peo

ple witnessed the 28th annual regatta of the National Association of Amateur Oarsmen on the Harlem river over what is known as the new speedway course. association that the meet was held in New York's vicinity and there was intense interest in all sporting circles.

The first race on the program was the international four oared shell race. The starters were the Wachusett Boat club of Worcester, Mass., and the Detroit Boat club of Detroit. The Wachusetts were the first to catch the water. After a few strokes, however, the Detroits drew level and then commenced a rare tussle. The Wachusetts finally won by

21/2 lengths of open water. Joseph Nial, a slim youngster from the Laureate Boat club of Troy, secured a decisive win in the first heat of the intermediate singles.

The pair oared shells was a veritable gift to Exley and Busche of the Vesper Boat club of Philadelphia. Rogers and Connell of the Union Boat club of New York, to the surprise o

everybody, won the first heat of the intermediate double scull event. The association singles furnished a very pretty contest. Marsh of the Don Rowing club of Toronto was first away but F. J. HIGHER EDUCATION

Most of the Grammar Graduates Will Continue in School.

Of the three hundred and nine grad uates of our grammer schools June 28. two hundred and eighty-five were given certificates which permit them to enter the High School without examination. Of these two hundred and eighty-five, two hundred and sixty have an nounced their intention of entering in September some higher school. This means that ninety-one per cent. of those receiving certificates will secure additional education.

Of the two hundred and sixty, two hundred and eighteen have selected their studies and registered their names in the Quincy High School. Forty-two will enter Adams Academy, Woodward Oliver which is without doubt the most

YOUNG CROSS HANGED.

Death Penalty Inflicted In Connecticut State Prison This Morning.

Murdered and Outraged a Woman Sixty Years Old.

Story of the Crime and Strong Efforts to Save the Murderer's Life.

Hartford, July 20 .- For the ninth time within six years the gallows at the state prison at Wethersfield was brought into requisition, and as has been the case on every occasion the introduction of the so-called automatic galows, the execution was attended with no untoward gruesome scenes. Charles B. Cross, upon whom the drop was sprung at 12:09 this morning, was the youngest murderer ever executed in Connecticut, being but 18 years of age.

It was feared that Cross would colapse as the fatal moment approached, despite his frequent reiteration that he would die like a man, but he walked from the death chamber to the execution room unassisted, and displayed no nervousness when the black cap was put on, and the noose adjusted. When the trap was sprung his neck was instantly broken, and at the end of three minutes Dr. Fox, the prison surgeon, pronounced him dead. The remains were buried in the prison graveyard.

The crime for which Cross paid the penalty of death has attracted much attention because of the youth of the prisoner, the revolting character of the murder and the unusual efforts made to save him from the gallows.

His victim was Sarah C. King, a frail delicate woman, 60 years of age, the wife of Freeman King, a New York printer She lived in a farmhouse at The Farms about nine miles north of Stamford and London, July 20 .- William Waldorf of visiting the farm once a week and Astor has apparently reached the con- spending Sunday there. It is a lonesome clusion that he made a grave blunder locality. Partly to save his wife from when he publicly insulted Captain feeling lonesome, and partly to assist in Charles B. Cross of Brooklyn, 17 years old, to live there. He performed his

duties fairly well for several weeks. On the night of Nov. 7, 1899, the boy alarmed the neighbors, and told them the house had been robbed, and that ing should have been published under a Mrs. King was unconscious. It did not appear that there had been any robbery although a few of the bureau drawers had been opened and their contents were in confusion. Soon after neighbors reached the house the woman died. She was found lying upon her bed, entirely nude, and there were evidences that she had been ill treated. The injury which caused her death was a fracture of the

house about 10 minutes, when he returned to find the woman in the condition described. He said that just before he retire. He was arrested on suspicion and five days later confessed that he was the woman's murderer. Cross confessed this apology is now forthcoming, and that he laid in wait for the woman as Astor has narrowly escaped the ignoit is widely asserted that his forced floor until she was unconscious. He repentence will not save him from being then tore off her clothing and otherwise maitreated her.

A strong fight was made at the trial to prevent the admission of this confession as evidence. It was admitted, and then the defense endeavored to show that the boy was insane. Numerous expert witnesses were examined, and relatives of the boy testified in support of the theory that he was not in his right mind.

dered by One of Her Boarders. Boston, July 20 .- Mrs. Ellen Burt, a widow, aged 46, was killed Thursday evening in a quarrel with George H. Whidden, aged 45, a boarder at her house, €46 Harrison avenue, the weapon used being a butcher knife with a blade 17 inches long. Whidden is under arrest. When the police arrived at the house the rooms in which the cutting occurred were smeared with blood, and gave evidence of a terrible struggle. On the of William Jennings Bryan and, like kitchen floor lay the weapon which in- him, is a native of Illinois. flicted the fatal wounds. The body of the woman was removed to the city after the struggles of the dying woman had ceased, Whidden left the flat, and, going to the house of a friend, washed his hands and face, which were covered with blood, removed his stained clothes, and procuring other apparel at a nearby store walked down the street, as if nothing had happened. When the police overtook him he stoutly denied any knowledge of the alleged murder, admitting, however, that he had been in the quarrel, but declaring that Mrs. Burt lid the cutting herself.

Whidden is a teamster, and had for six rears boarded with Mrs. Burt. It is said that quarrels were of frequent ocurrence between the two, and when oud talk was heard coming from the ouse Thursday nothing was thought of it. Just when or under what circumstances the fatal blow was struck can-

not be ascertained, but it is certain that when the woman pursued Whidden through the house to the roof of the house she was bleeding profusely. She followed him back through the house to the kitchen, leaving a trail of blood behind her, and going into the parlor she sank to the floor, where she expired. At the police station Whidden main

tained that he knew nothing of the cutting, holding firmly to the statement that he was in a struggle with the yoman, but beyond striking her across record of attendance at every session of the face with his hand, he did her no the legislature since he has been a mem urther injury. The blood-stained lothes which he discarded were found by the police in the house where he went to cleanse himself.

Have Got Beyond Control of the Help at Disposal of Fire Wardens.

Sandwich, Mass., July 21 .- A wall of dame, leaving in its wake a wilderness of smoking stumps, marking the trail of gating \$7000. All are very well exeone of the worst forest fires the cape has cuted. struction nearly a score of towns about this portion of the cape district, is the result of a tiny blaze started Thursday n the vicinity of Hatchville by some perry pickers. Hundreds of men, rawn from every town in this neighbor- and locked up. hood, are working night and day to check the progress of the flames, but as the brush is as dry as tinder the men are ilmost helpless, and their lives are constantly being menaced.

The flames are traveling through some cape as fast as a man can walk, and the xcitement is intense in all the surwhat shift of the wind that the flames will sweep some luckless settlement out

The fire now has no general direction, but is spread out in the district between Sandwich and Buzzard's Bay, bounded by the main line of the Consolidated road and by the towns of Cataumet. Wenaumet and Falmouth, and the brush nd timber between is a roaring mass of mes. The fire wardens have been unable to make out what course the flames will take, and oftentimes, backfiring, which it was hoped would keep the fire within bounds, has proved of no avail, and the back fire is carried away in the huge head fire. It has been a terrible battle for the men, and many are coming out of the woods in an exhausted condition, and they express no hope that the fire will be checked unless rain comes. Men in sufficient number cannot be brought here, and the fire is entirely out of the control of the help at the disposal of the wardens.

At noon the main fire was working towards Hatchville, but another shift of the wind sent the flames back so that they are now headed in the direction of Sandwich and Sagamore. A arge gang is back-firing on the Foster North road to prevent the fire from reaching the town of Bourne.

The magnitude of the conflagration and the lack of help had its effect upon the men now struggling to protect property. A gang of over 100 men were fighting the flames near Sagamore, when, by a change of the wind from southeast to southwest, the flames surounded the gang, and only through the careful guiding of Fire Warden Burgess a large number were burned.

No estimate of the damage already done can be given, nor can anything definite be said as to the progress the flames will ma'e, and the probable damage they will cause.

SEA AIR AND BATHING.

As They Concern Children-Suggestions to the Mothers.

The summer exodus of mother and child has already begun. Some are seeking health and strength in the heart of our grand old mountains, othrs in quaint vine clad farmhouses in the country, where the children can wear old clothes, climb, ride on hay wagons, fight hornets' nests and, we fear, eat green apples unmolested, and other happy bands armed with their little spades and shovels are on the way to breathe the ozone from the sea. To the mothers of those seaward bound a few suggestions are offered in the New York Herald.

Too often little ones are brought home ill in a few weeks, and the mothers declare it was the food or "the malaria from a pond back of the hotel" or "the bad drinking water." More often it is because the mothers have allowed their children most injudicious liberty.

Sea air, with all its tonic effect and ozone, cannot digest crab salad in the William K. Vanderbilt, Jr., the stomach of a 5-year-old child. NATIVE CITY BURNED.

Allies' Casualties at Tien Tsin Said to Have I'een More Than a Thousand.

British View Message From Conger With Suspicion.

Russian Operations In Manchuria Carried Out With Great Brilliancy.

London, July 21 .- The Daily Express has received the following from Tien Tsin, dated July 18:

The casualties of the allies in the three days' fighting before the native city of Tien Tsin exceeded 1000. It is now certain that there were several Russians and Frenchmen fighting on the Chinese side. The Chinese killed their own women wholesale to prevent them from falling into the hands of the Russians. Yesterday the whole native city was in flames, and the stench of the burning

thousands of corpses was unspeakably horrible. Among the incidents of the fighting on July 11 was the precipitate flight of 500 French troops from Annam. They had been ordered to hold an important front, but, on being charged by the Chinese with bayonets, the rear detachment bolted, panic-stricken. The Rusians killed all the Chinese wounded in

revenge for the Pekin massacre. The Conger dispatch fails to carry conviction to either the British press or public. Its genuineness is not disputed: for, as is pointed out here, the Chinese must possess quite a sheaf of such messages, which the ministers fruitlessly endeavored to get transmitted, from which they could easily select a non-

committal dispatch to serve the required

It is argued that the dispatch, if it were genuine reply to the enquiries of the American government, would go more nto details. A slight ray of hope is admitted in the fact that both Mr. and Mrs. Conger are known to have been on very friendly terms with the Empress Dowager, but the universal opinion here is that, if the dispatch is genuine, the date is falsified.

The bare possibility that the news of the massacre was premature, however, has had its effect, and the government has issued a semi-official disclaimer of responsibility for the proposed memorial service in St. Paul's cathedral, while the newspapers are calling for the postponement of the service until all doubts

The Daily Telegraph, in an editorial congratulating the Washington government upon its energy, says: Unless the powers are capable of responding immediately to Mr. Hay's appeal by ordering their united forces to face and risk all for an immediate advance, the days not only of old chivalry, but of

modern humanity are dead together. Sir Halliday MacArthur, counsellor and English secretary to the Chinese legation in London, who was interviewed esterday, admitted that the legation Leave CITY SQUARE (10 minutes later from | was in receipt of news which it was not Quincy Point and 22 minutes later from North Weymeuth) -5.45, 6.20, 6.50, 7.20, 7.50, 8.20 8.50, 9.20, 9.50, 10.20, 10.50, 11.20, 11.50 A. I cannot say why the other ministers are not able to communicate with their governments, but there is no reason why they should not use the same channel as Mr. Conger employed. Perhaps a supreme effort was made for Mr. Conger's message, and possibly the Chinese do not realize the anxiety existing in Europe."

St. Petersburg dispatches show that the situation in Manchuria is improv ing. General Gribski, after relieving Blagovestschensk, capital of the Amur government, received further reinforce ments and bombarded the Chinese village of Sakhalin, which was set on fire

The Russian troops advanced from the direction of the town of Nismennaja. The Chinese massed their troops in large bodies at various points, and made a stout resistance, but they were finally overcome. The town of Aigun was partly destroyed, and the Russians occupied all the important defensive positions on the right bank of the river. Griving the Chinese out of them.

The Russian operations were carried out with great brilliancy and slight loss. The Russians captured 17 guns, and killed 2000 Chinese

The Russian troops who were dispatched to the relief of the railway officials are now advancing successfully in all directions. The fine weather and a considerable rise of the rivers Amur and Shilka favor the operations.

A PERCEPTIBLE LIVENING UP.

Bradstreet's Reports Improved Crop Conditions-Textile Situation Complicated.

New York, July 21.—Bradstreet's says; Improved crop conditions furnish the keynote of the trade and price movements. As a result of them nearly all staple agricultural products are lower in price, and, at the same time, a perceptible livening up of demand for fall delivsections mentioned, while at the east the markets are slower to experience this improvement and are consequently seasonably dull.

Bank clearings as yet fail to reflect any perceptible improvement in distribution, and railway earnings, though of large volume, are, owing to comparisons being made with exceptionally good results last year, showing less notable increases both in gross and net returns.

Armament of Vessels Which Compose Her Small but Efficient Fleet. At the time of writing the Shanghai fleet consists of obsolete ships, utterly in the useless for fighting purposes, but the northern squadron has been built up again by the purchase of modern ships in Europe, says the London Mail. This fleet now consists of three cruisers, which have been built in Germany, of 3,000 tons each, carrying two 6 inch steaming 20 knots; four destroyers of a modern type, also built in Germany, and two large cruisers, which have been built at Newcastle-on-Tyne and Daughters of the Revolution, of Massachusetts, have only lately reached Chinese wa in memory of Captain Myles Standish and his ters. These two are sister ships and men of Plymouth Colony, who landed here in are the largest vessels which the Chinese have ever possessed. Their armament consists of two 8 inch and ten 4.7 inch, all quick firing guns, the 8 inch having fast electric trains gear, besides Maxims.

The speed attained on the trial was over 24 knots both for the Hai-Tien and the Hai-Chi, as the ships are named, each of which has a displacement of 4,300 tons. It is evident, therefore that China has at present a small but certainly an efficient fleet, if only it i properly handled. This is not likely to be the case, as there is not an offi cer of the Chinese navy who is capable of commanding a man-of-war and fighting her, and even were such an officer to exist it is doubtful whether he would be placed in a position of responsibility, as the eternal system of 'squeeze," which prevails from the highest to the lowest in China, means that commands and official positions of every description are obtained by thos who have the most influence, or, other words, who are in the position t offer the greatest bribe, and when once a command is obtained it is used as a means of making money, by only em ploying half the number of men for whom rations are drawn and a variety

of other means. Admiral Lang has undoubtedly le his mark on the Chinese navv. While he was in charge the standard of drill. gunnery and generally discipline was a very high one, and it will take some time for this to wear off; but wear off Telephone, residence.

It is characteristic of the Chinese that the naval depot should be at Taku. The dockyards, such as they are, are situated close to the mouth of the Pei-Ho; but there is no dock there capable of dealing with any of the fleet mentioned, and the approaches are so shallow that the ships have to anchor eight miles from the entrance to the river, quite out of sight of land. There the fleet has lain for some considerable time, and there it will probably remain. Occasionally single ships go for a short cruise round the gulf of Pe-chi-li, but the fleet has not yet been taken to sea.

"And how do you feel, Mr. Smith?" And Mr. Smith would always answer because it pleased the child: "First rate, Joe."

"That's nice," said Joe. And so he would ask each in turn, and to each answer, always the same, he would reply cheerfully, "That's nice."

And when they asked him how it went with him he always said, though sometimes with an effort, "I'm pretty well, thank you." Then everybody would say with real pleasure, "That's nice, Joe."

So the summer went on, and very few patients came to the hospital, and John and Joe were all alone, save for the nurses who grew to dread the time that was soon to part the friends.

THE YAQUIS' GOLDFIELD FAITH CURIST ORPHANAGE.

How It Was Found by Two American Prospectors.

CAREFULLY GUARDED BY INDIANS.

Story of Charles Ericksen and Harry ences With the Yaquis-Will Return With an Armed Expedition.

Reports from central and western of copper and gold mining interests in the southwest is soon to be transferred southward from Arizona and New Mexico. Almost daily come statements, some from very reliable sources, of great ore finds in the states of Sonora and Chihuahua, Mexico. The latest story to which credence may be given is that of Charles Ericksen and Harry Tharoldson, two New York state men, who have been prospecting in the Mexican mountains for the past two or three years. They passed through Phenix, A. T., the other day, en route to San Francisco, and exhibited a large quantity of gold from placer fields at some point along the southern side of the Sierra Madre range in the lower portion of Chihuahua or the northern part of the state of Durango. They are very reticent about their find, but to a New York Sur correspondent intimated FIRST PRESBYTERIAN CHURCH, Water street that there was plenty more gold where theirs came from, but that it was care-

Ericksen estimates that he and his partner have about \$18,000 in dust and tells of peculiar circumstances under which it was secured. About the mid dle of May the two prospectors found traces of gold in a small stream, the exact location of which they keep a secret. They followed the stream up into the hills and were washing out the dust in good quantities when they were attacked by a small party of Yaquis. Both miners were well armed, and for a day and a half they stood off the Indians. They were well intrenched in the front and protected in the rear by a huge rock formation, which prevented an attack from that direction. Singularly, the Indians made no determined effort to drive out or kill the two miners, but were content to fire an occasional shot and spend the time in conference. At the end of the second day an Indian, who was evidently the leader of the band, came out into the open, laid down his gun, raised his arms upward and walked toward the whites. Ericksen, who is the older of the two, saw that a truce was intended and went out to meet the Indian, also laying down his gun. They conferred in broken Spanish for a short time and the American convinced the Indian that he was not a native, but a stranger seeking gold. The latter assertion was received with very evident displeasure,

New Sect From Lincoln, Neb., Discovered by Philadelphia's Coroner. The death of a 7-months-old child in Philadelphia, which was reported to the coroner the other day, led to the discovery that nine children and five adults have been living in a six room house. The adults are faith curists, and they do not permit the children to have medical attention when ill.

At the inquest the leader of the party Tharoldson, Who have Returned said he was H. E. He is styled the reverend, but admitted that he had never attended a religious seminary and was never licensed to preach by any church, says the New York Sun. The headquarters of the sect are at Lincoln, Neb.

Sollenberger is a tall, gaunt fellow, stoop shouldered and with a sallow complexion and deep sunken blue eyes. He wore a long black cutaway coat and waistcoat of clerical cut. His can was similar to that worn by officers of the Salvation Army, and on the band of red, in black letters, was printed "Jesus Saves-Eternity-Where?" In answer to questions Sollenberger said that the "orphanage was supported by voluntary contributions." Asked why he did not have medical treatment for the child, he replied:

BIRDS' PLUMES AND RIBBONS What Will Be Used For Fall and

Winter Millinery. Birds are again to the fore, and there is a fair demand for clipped aigret, more especially as a trimming for capotes in combination with flowers. By providing fresh series of flowers without interruption, suitable to each division of the season as it comes round, those interested in their sale hope to promote a regular demand for them all through the autumn and winter.

As matters stand at present, it seems highly probable they will be successful. The reappearance on the field of ostrich and other kinds of plumage has made no notable decrease in the sale of flowers, says The Millinery Trade Review correspondent. If trimming underneath brims is maintained they will and the meeting ended abruptly by the certainly continue in request, as in this Indian declaring that the two whites position flowers are as applicable to could go away unmolested provided winter as to summer millinery. "PROMISES" OF DEWEY

As Alleged to Have Been Made to a Representative of the Filipinos.

Would Give Them Independence and Freedom.

Letter Purporting to Have Been Written by a General Who Recently Surrendered.

Omaha, July 23 .- A special to The World-Herald from Sioux Falls, S. D., says: A letter has been received by Senator R. F. Pettigrew from one of the eading commanders of the Filipino army in regard to the claims of the Filipine people as to the understanding that was arrived at between them and the Americans before the opening of hostilities in the Philippines.

The letter is dated April 12 and is ad-Pressed to R. P. Pettigrew and G. F. Hoar, senators, Washington, and says in

"I have read in some American papers hat Admiral Dewey, compelled by you and other senators, lovers of truth and justice, to answer whether he had made to us formal promises of independence, stated that he had 'never promised indeendence to the Filipinos.' I, who, in he name of the Filipino people and of General Aguinaldo, and as a representative of them, have had the honor to confer several times with the admiral, make you the following statements that you may use them as you should think that convenient.

"In April, 1898, when the rupture of nostilities between America and Spain became imminent, and in the absence of my chief, General Aguinaldo, who was then at Singapore, I solicited through the American consul at Hong Kong, Mr. Wildman, to have some interviews with Admiral Dewey, with the object of continuing the interrupted negotiations beween General Aguinaldo and Admiral Dewey, through Mr. Wood, the commander of the American gunboat Petrel. My petition was favorably received and other Filipino, on board the Olympia in the bay of Hong Kong.

"Once on board, the following interview in French took place through the flag lieutenant, Mr. Brumby, acting as

nterpreter: "Filipino-Admiral, having come to our knowledge that a war between your have fought the latter for our independence, are willing, in obedience to the Aguinaldo, through Mr. Wood, to take part in the war as allies of America, so long as it be carried on with the object of freeing from the yoke of Spain her colonies, giving them their independence, "Admiral Dewey-The American peo-

ple, champions of liberty, will undertake this war with the humanitarian object of freeing from the Spanish yoke the peoples under it, and will give you independence and freedom, as we have proclaimed to the world at large. "Filipino-We are very grateful for

this generous manifestation of the great American people, and being made through an admiral of their navy we value not more than a written contract and thereupon place ourselves at your entire disposal. "Admiral Dewey-I place at your dis-

posal the ships of my fleet for the conveyance of both the Filipino leaders and the arms you may get. Moreover, I ress. think my government is willing to supply you with arms and ammunition. "Filipino-We are very thankful to you for this new generosity of the Ameri-

can people, and you may be sure that we are ready to fight at your side for the independence of the Philippines, even without arms, as we have done during the recent revolution. "Admiral Dewey-America is rich in

every respect; she has territories sparsely inhabited. Besides, our constitution prevents 'territory expansion' outside of sure of their independence and not a bit of their land shall be taken from them. "After these conclusive and formal statements the conversation turned to other details concerning the state of the

Manila, July 23.-Senor Buencamino last Thursday sent to Aguinaldo by means of Aguinaldo's mother the amnesty resolutions adopted by the meeting of representative Filipinos here on June 21, together with General Mac-Arthur's answer to them and other documents bearing upon the restoration of peace. It is understood that Aguinaldo will summon his advisers, and that a reply may be expected within a month. It is officially announced that last week 200 insurgents were killed and 130 surrendered or were captured. One hundred rifles were taken. Twelve Americans were killed and 11 wounded. Buying Ducks.

There are two ways of securing a duck.

The easy and cheap way is to go to the market and make your selection. The other way is to buy a gun, ammunition, shooting suit, decoys, and a dog; travel about forty miles on the train; hire a guide and a boat; slop around in the mud for thirty-six hours in a soaking down-pour, miss the only duck you see and buy one at the market on your way home.

We have all been through that duck shooting, but it's ghastly when you meet it in business. And you sometimes do.

### FACTS ABOUT HAIR.

The encyclopedias regard hair falling pelow the feet of women as extraordi nary.

Several years ago Miss E. J. Whitten. of Topsham, Me., was said to have hair eight feet in length. Marie Antoinette wore a pompadou

and rolls thrown back past her ears Queen Anne wore side curls. A hair is a succession of cylindrical of elliptical horny cells. Curly or kinky hair is due to sudden "breaks" in the reg ularity of the cellular succession. Short hair was the style under the Francis I regime, but with the court of

Louis XIII came long hair as a fashion curls, wigs, powders, periwigs and pe Samson's strength was attributed to his long hair, and his fate is charged up to Delilah's shears. Absalom's wealth

of tresses was the cause of his own In Egypt long hair was considered an incumbrance. It was a feature of beauty among the Hebrews and Greeks. Ro man ladies used artificial hair and set

the pace for future coiffures. Peasant girls in the south of France cultivate and sell their hair as a regular business practice. Traders who attend the fairs purposely to traffic in tresses frequently find hair five feet in length, and hair si, feet long is very scarce.-San Francis to Examiner.

British South African Campaign Is Running Against Many Spags.

Roberts' Line of Communications Cut by De Wet.

Supply Train and a Hundred Highlanders Fall Into the Hands of Boers.

London, July 24.-The long silence which has followed the brief announcement that the Boer fox had broken from the mountains with two brigades of mounted troops after him is now broken by the tidings that he has, swooped down on Roberts' line of communications and gathered in a supply train and a detachnent of one of Britain's crack corps as prisoners. Doubtless he is away to cover again ere this, leaving behind him a wrecked railroad, that it will take the British days to reopen. His prisoners, for he cannot hold them, will doubtless eard from next in their arrival at Lady-

Their horses ought to be worn out by this time, and they cannot be sure of getting remounts or supplies; but their mobility is unceasing, and socalled flying columns on the British side are unable to overtake, hunt down and capture the commandoes.

The London morning papers feel compelled to recognize General De Wet's clever strategy in baffling all efforts to catch him, while constantly harrassing the British lines of communication.

AN ALABAMA LYNCHING.

Negro Who Assaulted a Girl Is Taken From Jail by a Mob and Hanged. Huntsville, Ala., July 24.-Elijah Clark,

a negro, who on Sunday assaulted Susan Priest, 13 years old, was taken from the jail in this city Monday and lynched near the spot where his crime was committed. His body was riddled with bullets. Sheriff Fulgram defended his prisoner to the last, but he was dragged from the jail. William Vining, who attempted to rush through the growd and up the jail steps, was shot and dangerously wounded.

A crowd of 150 men, principally employes of the big cotton mills at Dallas, a suburb of this city, searched the woods all night for Clark, who was identified at the time he assaulted Miss Priest by her little sister. No success attended their efforts, and early Monday morning Sheriff Fulgham started out with a posse and before 9 o'clock had captured Clark. He was soon landed fn jail, and by 1 o'clock the news of the prisoner's capture was heralded to all parts of the Sheriff Fulgham wired Governor Johnson the facts in the case. The governor responded to the effect that he had ordered militia to proceed with all haste to the scene.

The mob by this time had assume clarming proportions, and the sheriff announced that a special trial had been arranged for the prisoner, and that he would be brought before the court at 3 o'clock in the afternoon. This was greeted with jeers by the crowd.

The outer door to the jail, a wooden barrier, was soon battered down and the mob gained entrance. Fully an hour was consumed in breaking the lock to the cell in which the culprit was cone set free on the Natal frontier, to be | fined, but as soon as this was accomplished two men secured Clark and juickly appeared with him on the front steps of the jail. A plow line was placed around his neck, and guarded by 20 heavily armed men in fours he was dragged out of the jail yard. The doomed man was taken before his victim and positively identified. The rope around Clark's neck was thrown over the limb of an immease tree by Miss Priest's brother. The negro was thrown across the back of a horse and the aninal was led out from under him. The body was riddled with bullets. Just as the work was finished the militia arrived at Huntsville.

We have never had much to say about Tea, because we have always been very particular in selecting Teas and almost all our regular customers buy their Tea of us, besides some others, now we are confident that if you will take one of our samples of Oolong Tea that we sell at 50 cents per pound you will find a nice flavored tea, one that is actually good enough for anybody to use.

Our English Breakfast that we sell for 50 cents per pound has a particular flavor that we find pleases and we always select that flavor.

We know that most Grocers have a habit of saying that the Tea they sell for 50 cents is worth 60 or 75 cents a pound. We will not say exactly that but if you are paying the high price compare our samples, if you wil!, we shall look for an order for a pound.

that Madame Yale's Excelsior Hair Tonic is the first and only remedy known to chemical science found to be a genuine hair specific. It has an affinity for the human hair for nourishing and invigorating its entire structure. It is antiseptic in character, as well as stimulating; its action upon the scalp and hair is truly wonderful, inasmuch as it has never been known in a single instance to fail to cure scalp diseases ancito create a luxuriant growth of healthy, beautiful hair. It stops hair falling within twenty-four hours and brings back the natural color to gray hair in nearly every instance. It is not a dye; it is not sticky or greasy; on the contrary it makes the hair soft, youthful, beautiful and glossy; keeps it in curl. It is a perfect hair dressing, and can be used by ladies, gentlemen or children as a daily toile requisite. Its influence is delightfully soothing. Its influence is delightfully soothing.

# Mediation.

The acceptance by President McKinley of the position asked of the United States by the Chinese govern-Notary Public. ment, as mediator in the existing difficulties, is to be commended. The United States holds an attitude

# towards China which especially qualifies it or the performance of this work. It is interested equally with the European powers in the removal

of intolerable conditions at Pekin and sponsible for the outrage, and, thanks How They Will Observe to the good sense of Admiral Kempff, it is not involved in the error of the the Day at act of war committed in the attack upon the forts at Taku. This latter

onsideration undoubtedly controlled the action of the Chinese government in calling upon the United States to assume the work of mediation. But before this work is undertaken Park. he situation must be cleared up fully and positively. The United States cannot approach the European powers in such an affair while the plainest in-

ternational duties of China are ignored, It cannot proceed on the assumption that there has been no slaughter of envoys, no murder of women and children, while Pekin is closed to communication with the outside world. It must have, in fact, assurance that the government for which it undertakes he work of mediation really exists as a de facto government. And until the representatives accredited to that government are placed in the position which is theirs and can communicate with their respective governments, any proposition for mediation would be

More especially, Mr. McKinley's acceptance cannot be taken to absolve the owers interested from preparations o enforce their rights and to protect their representatives at Pekin; and it surely cannot interfere with the action of the United States looking at this end. The first duty of the United States is to its own citizens, and this the President is expected to carry out. It will be his business to see that in the adjustment of the affair the United States is not drawn into complications contrary to the national policy. - Bos-

### Boys Robbed Safe.

A clue to the band of youthfu thieves, ranging from 9 to 13 years, who have worried the police of Boston during the past few months by a series of petty burglaries, has at last been found in the capture of Edward Amblady, an Italian, nine years of age, charged with breaking and entering the marble shop of C. E. Hall & Co., 69 Charlestown street, early Sunday morn-

Young Amblady, who lives at 117 Charlestown street, was arrested by Patrolman French who had his attention called to Amblady, who was buying confectionery, and soda at different variety stores and displaying a large handful of money. Lookout, Winner of the Quincy Yacht Club \$500 Challenge Cup.

[CUT LOANED BY BOSTON SUNDAY POST.]

The Lookout was built by Fenton of Manchester and is owned by Higginson & Boardman. She is as near like the Hostess as possible, but more powerful. She has about two feet more beam and is about four feet longer over all than the Hostess. She is of light construction and the races proved a hard strain on her hull. From the first, yachting experts said that the Lookout was the only one of the challengers that the Hostess had to fear, and it was only a question whether in building her it had been overdone. The experience at the races, however, showed that the work had not een overdone.

A VISTA OF FASHION.

Waves on the Changing Sea of

Modes-Ruffs and Other Things. Foreign fashion seems to have adopt-ed into its best affection the neck ruf-in many a home these are the symbols Foreign fashion seems to have adoptfle. Indeed, upon the manner of dec- of the success of the man who did not orating the throat depends much of find time to care for his health, or negone's reputation for being well dressed. Just now it is the net ruffle, threaded with chenille at the edge and with long chenille tassels, which English women most affect. Remarkably pretty ruffles are made of black net or white tulle or lisse, hemmed with narrow black, and these over light pink or blue frocks have a special charm. From Paris comes the news that ruffles are made of silk in the form of petals of rose leaves in pale colors to match the

dress they complete. It is said also that huge white feather boas will cast their softening influences over many summer gowns, while the charms of white lisse or black tulle boas with tiny black ribbon edges will be variously utilized.

The sleeve with blouse sleeve be neath is another of the ripples in the current of fashion. A neat example of this appears in the gown here sketched, which altogether commends itself by its quaintness, a revival of the fishwife style being observed in its turned up tunic. This dress can easily be imagined achieving a pleasant effect made in pink alpaca with revers and collar of white silk striped with bands of black satin ribbon, the black satin ribbons forming an undulating design wound the sleeves and the skirt which reveals a kilted underskirt and is completed with a black satin band with a white mousseline shirt front. dion kilted white silk muslin furnishes the undersleeves. It is a rather striking confection designed for boating

There is a strong suggestion of the empire period about the foulard dress sketched. This is made in pale blue with rings of black upon it. A touch of black, by the way, is introduced into all the best gowns today. The bole ro is of lace over a band of black vel vet tied into a bow on the bust, while the skirt is tucked at the waist. Com pleting this is the ruffle aforesaid made in this instance of white gauze with long chenille ends.

Dust cloaks are an all important item of one's summer sartorial economy. The wise woman is she who has a handsome dust cloak and makes it do duty. Gone are the days when a dreary garment considered good or bad enough to roll up and sit upon as a cushion when occasion demanded can pass muster as a dust or traveling coat. The most important of these coats are in empire style, usually of taffetas, with rich revers and handsome sashes tied round the figure. Parisiennes with their proverbial sense of fitness have selected foulard for the coats, which position, which are now in vogue.

How to Fold a Dress Skirt.

All cotton skirts retain their shape and hang better if folded each time after they are worn instead of being hung in the closet. They should be Quincy. at folded in horizontal lines rather than r *6 12 abc longitudinal lines, as the tendency in wearing is always toward lengthwise creases. First stretch the garment out the full width, then double it downward from the belt to half the length of the skirt, then double it over once in a lengthwise fold, the only one that should be made. Keep a long wide box covered with denim and lined with cambric to accommodate these skirts | and pile them in lightly one above the |r other. SERIOUS OBJECTIONS

Likely to Be Raised Against Launching of a Third Presidential Ticket,

The Middle West Regarded as the Battle Ground.

Indiana Democrats Not Unlikely to Go Over to Bryan in a Body.

Indianapolis, July 25.—The proposed combination of the Gold Democrats and Anti-Imperialists in support of a third presidential ticket will meet with seious local opposition. This will proreed from these sources: First, the Gold Democrats who oppose the idea of a third ticket on general principles, and, second, those who would be willing enough to put up a third ticket of their wn, but who do not care to involve their party in an alliance on any principle not set forth in the national Democratic platform of four years ago. The reluctance, as stated, is local and frankly urged on the ground that local conditions, irrespective of those existing in the country at large, seem to the old managers of the national Democratic movement in Indiana to make a third ticket this year inexpedient The prospect is that the whole of the vote of the middle west generally at the forthcoming conference will be thrown against the third ticket movement, and that its support, if it is to prevail, must come chiefly from the east.

John Frenzel is in some ways the most notable figure in the national Demo cratic leadership here. He is secretary of the national committee and has handled all the correspondence concerning the approaching gathering. In answer to questions, he said: "As to the outcome of the meeting to be held here today, I venture no opinion. In my po-sition it would be indelicate. But I have my own notion, as a Gold Democrat in Indiana, that it will be unwise to go further than to state our principles afresh and then to advise all members of our party to vote for one or the other of the candidates now named, as their consessence may dictate."

Mr. Frenzel regards Indiana and its neighbor states-Ohio, Illinois and Wisconsin-as the battleground in the presidential struggles, and thinks that the third party would be wise to ascertain what the leaders in 'hese states think would help or hurt the cause before deviews of John Frenzel have been quoted here at length as typical of the spirit with which the eastern third ticket contingent must be prepared to cope. On the other hand, there is abundant evidence to anyone who looks the field over candidly that some vigorous work tically in a body to Bryan. Several of

will have to be done if the Democrats of Indiana are not to be handed over practhe Gold Democrats of prominence have McKinley on the silver issue, no matter what comes; but the rank and file seem hesitating, and not a few have already said that the silver question seems to them a dead issue, and they are willing to accept Bryan now with his four years of broadening. The sentiment seems rather a negative kindliness toward Bryan personally than by positive conversion to the principles he represents. Evans Woollen, who was the candidate for congress on the Gold Democratic ticket in 1896, says that when a recent effort was made to get the Gold Democrats together at a meeting a large number who had formerly been very stanch | four killed and 19 wounded, anti-Bryanites answered that they would not take part if anything were to be said or any action to be taken at the meeting which would commit them not to vot for Bryan next November. This spirit is believed to be rather widespread and to indicate a serious increase at least of indifference if not actual apostasy.

Where Boutwell Stands. Indianapolis, July 25.-A letter received here from George S. Boutwell, president of the National League of Anti-Imperialists, declares that the writer has no knowledge of the proposed fusion with the Gold Standard Democrats at the meeting of the latter's na-tional committee. He indicates that he would oppose such fusion. Sentiment regarding the nomination of a third ticket is mixed. The Indiana contingent has declared against such a course.

Requests for mediation addressed to foreign powers are interpreted here to be a preparation for the acceptance of foreign aid to repress the rebellion. Li Hung Chang's statement that he could restore order with 20,000 white troops is looked upon as a subtle argument in favor of appointing him to the command of the allied forces, to the exclusion of a Japanese.

Description of New Vessel Designed For Diamond Shoals.

WILL BE PROPELLED BY STEAM.

Lights of the New Craft Which Is to Defy the Gales and Seas Off Hatteras Will Be the Most Powerful Displayed From Any Lightship Afloat-Her Fine Equipments.

Extending out into the Atlantic

ocean for 13 miles and paralleling the Cape Hatteras coast for a considerable distance are the much dreaded whiskey and fight and trouble. -Brock tom's church of Wollaston. The bride Diamond shoals, upon which the govwas attended by her sister Miss Mary ernment once contemplated placing a M. Souther and the groom by Mr. Leon \$1,000,000 lighthouse and on which several ineffectual attempts were made at such construction. There for three years a light vessel has successfully ridden out many of the severest gales sweeping that part of the ocean, breaking away occasionally, but always managing to make safe harbor except in one instance, when she beached and was hauled off much damaged. It had been proved that a light vessel could stand the shifting sands and the heavy blows, but the experience of the first vessel put there showed that another kind was more suited to the dangerous task of marking the treacherous shallow spot. Now a new lightship is to be located there designed to hold no matter how the winds blow and the seas run, and, if there is enough botom, always to swing tightly to her anchor, says the Washington correspondent of the Baltimore Sun. This vessel will soon be completed and is to be stationed off Hatteras in August. She will be a steam propeller and electric lighted, and when finished will be one of the first, if not the only one, of ner kind ever launched.

The government contract calls for a craft 112 feet in length and a depth of over 15 feet, with three decks, the main and spar decks running the full length of the ship, while the lower deck is broken by the forward coal bunker and the after bulkhead of the engine room. The hull will be divided by water tight steel bulkheads into five compartments and the quarters and storerooms are so arranged as to meet all requirements of safety and omfort. The accommodations of this vessel

are to be forward of the main deck. There will be two hollow steel masts. through which will be run the wiring of the masthead flashlights to throw rays many miles to sea. These lights, hree in number, on each mast, are to be adapted to both electricity and oil. the latter being used in event the dynanos fail to operate. The cluster mast headlights will be 50 feet above the water line. These lights will be the most powerful displayed from any lightship afloat and should be seen at least 18 miles distant. The cluster will consist of six 100 candle power 100 volt lamps, and they will be controlled by an automatic flashing device driven by her cables part.

When No. 72, as she is now officially known, is on her station off Hatteras, her mooring tackle will comprise a heavy mushroom anchor shackled to a hawser hole in the stem of the ship to Mr. Harper says that he does not care a steam windlass. In addition to this of 11/8 inch stud link chain with a breaking strength of 79,000 pounds.

Amidships, on either beam, will be swung two whaleboats of about 26 feet length and 6 feet beam. The spar deck is protected by a gradually rising steel wait, flaring somewhat at the knightheads until at the stem proper it has a depth of five feet. > The Great Modern Tramp. The much decried "ocean tramp" of the present day exceeds in speed the passenger and mail steamer of 50 years ago, says The Marine Journal. Within ten years vessels in which cargo carrying is the chief element of commercial success have been increased in length from 300 or 400 feet to 500 or 600 feet; the gross registered tonnage from 5,000 to over 13,000 tons; and in speed from 10 or 12 knots to 15 or 16 knots. Vessels are now building for the Atlantic service which can carry from 12,000 to 13,000 tons dead weight, in addition to passengers, while possessing a sea speed as high as that of the swiftest mail steamers afloat in 1880.

# NO SALARY CUTTING.

### Reports of Reductions of Cuban Teachers' Pay Completely Exploded.

rrived in Boston yesterday and almost he first thing he did was to explode he sensation created by the incorrect stories told of impending reductions in of small cottages for there is not much the salaries of the Cuban teachers now question but what they would let n Cuba.

In explaining the mistake, Gen. Wood said:

"The probability is that the official rder got into the Havana paper prematurely. We were very busy about that time getting out a mass of official matter, as it was just at the close of the fiscal year. The Havana paper got there should be a good crowd. things wrong in many ways. The order originally provided for a reduction of the salaries of Havana teachers from \$75 to \$65 a month. This I did not favor, and the decision was finally carried to keep the salary at \$75.

Then in regard to the holding of ompetitive examinations, the law provides for such examinations Aug. 1 of each year. But, together with some other causes, this provision was suspended for this year, and the date of you can see, will enable every Cuban teacher now at Cambridge to finish the ummer work and have time to supplement this instruction with study at ome before taking the examinations.

The only Cubans now at Cambridge whom the law may possibly affect are a ew professors from the university at Havana, where in one department last year there were 17 students and 43 proessors. And these Cuban professors now at Cambridge are not, strictly speaking, numbered among the teachers whom the Harvard summer course was intended to benefit.

"I want to say, too, that the pay of orimary teachers in Cuba is more iberal than that of any city or town in he United States, with possibly only hree or four exceptions. Not only are they well paid, but they are continuous ly paid for 12 months in the year."

# AGREES TO ARBITRATE.

But President Must First Be Assured of Safety of the Ministers.

China Must Also Co-operate With the Relief Column.

One of the Powers Suspected of Planning a Campaign on Its Own Account.

Washington, July 25 .- President Mc-Kinley, assuming that the Chinese government is acting in good faith and that the disturbance which has taken place within the empire was the work of malefactors and beyond the control of the central authorities, has answered the alleged appeal of the Chinese emperor, Kwang Su, for his intercession with the powers to prevent further bloodshed to the effect that under certain conditions he will undertake the task.

The conditions are: (1) that ample assurances be given that the foreign ministers are alive; (2) that they be put in immediate communication with their respective governments; (3) that the Chinese government co-operate with the relief column to procure the relief of the legations besieged at Pekin; (4) that this being done, he will with the consent of the powers endeavor to straighten out the international difficulties which now prevail.

The belief is not concealed here that the chances for successful mediation are slight. Mediation cannot be forced upor a party to a cause: it must be acceptable to all the parties. If the United States is to mediate in China's interests she must first secure the assent of all the powers who have suffered in life or property at Pekin. The difficulties in the way of such an undertaking are likely to be many and serious, in view of

is not known, but it is supposed to have come from buttermilk, of which all of the members of the family drank freely on June 29. While at the hospital, un der treatment for ptomaine poisoning, Mrs. Eagan became the mother of a perfectly healthy boy.

Doubt as to the nature of the poison ing arose from the test by a local expert of samples of well water taken from wells used by the Eagan family. The expert found arsenic in the water. The state board of health took samples, tested them, but found no arsenic Other samples are now being tested by the state board of health.

A BELATED MESSAGE.

Conger Reported on July 4 That the Ministers Were In Dire Distress.

Grave Danger of Massacre by Chinese Soldiers.

Story of Mysterions Disappearance of a State Department Cipher Code.

Washington, July 26 .- The bureau of navigation at the navy department has received the following cablegram from Captain Charles M. Thomas, commanding the flagship Brooklyn in Chinese

Che Foo, July 24.-Navigation bureau Washington: Written message, signed His symptoms at present are similar to Conger, dated July 4, received Tien Tsin, 21st, says: "Been besieged two weeks, British legation. Grave danger general massacre by Chinese soldiers, who are shelling legation daily. Relief soon, if at all. City without government, except by Chinese army. Determined massacre all foreigners Pekin. Entry relief forces into city probably be hotly Thomas. contested."

This dispatch will tend to make those who discredit the alleged Conger dispatch of the 18th more sure of their ground. There is no question of the Babies' Silk and Muslin Bonnets and Pique authenticity of this last dispatch, and it shows it on its face. It will be argued that if the Chinese government had given Mr. Conger an opportunity to send a message to his government he would have sent a message more like the one of July 4, giving in some aetail the situation rather than a few words which could have fitted any moment from the middle of June to the present moment.

This message from Minister Conger was the first communication of unquestionable authenticity which has been received from the American minister at Pekin since his urgent appeal for help of June 12. It establishes clearly the fact that the American minister, and probably the other legationers, were alive on July 4, though in sore straits. Therefore, it completely and finally disposes o the first stories that were published from Shanghai of the massacre of June 27 It is true that it does not in itself negative the subsequent reports of the massacre on July 6, two days later than the dispatch. A notable omission in Mr Conger's dispatch is the failure to mention the assassination of the German minister at Pekin, which surely occurred many days before he wrote his message.

dispatch from Minister Conger, dated at | furnace. He seized Campbell, who was Pekin on the 18th inst, has developed the fact that, several years ago, a copy of the state department cipher code dis- | badly burned, but neither will die. appeared and never has been recovered. These code books are numbered and receipted for when placed in the hands of those entitled to them. The intimation fell into the hands of the Chinese government. This information was calculated to inspire a doubt of the au-

thenticity of the Conger message. State department officials decline to discuss the story of the theft of the code book, but do enter a denial that they ever entertained a suspicion that it had fallen into the hands of the Chinese government. It is known that several years ago a copy of the old state department cipher, which since has been changed, was made. A copy of this, the authorities have strong reasons to believe found its way into the possession of another government-not the Chinese. This old code has been out of use for many years, but Minister Conger is one of the few officials who has been using it.

He does not employ the new code. Michigan Democratic Convention.

Detroit, July 26 .- William C. Maybury mayor of Detroit, was unanimously nominated for governor of Michigan or the Democratic ticket. Half a dozen other candidates were presented, but they withdrew before a vote was called. and the nomination of Maybury was made by acclamation. # Madame Yale's

that Madame Yale's Excelsior Hair Tonic is the first and only remedy known to chemical science found to be a genuine hair specific. It has an affinity for the human hair for nourishing and invigorating its entire structure. It is antiseptic in character, as well as stimulating; its action upon the scalp and hair is truly wonderful, inasmuch as it has never been known in a single instance to fall to cure scalp diseases and to create a luxuriant growth of healthy, beautiful hair. It stops hair falling within twenty-four hours and brings back the natural color to gray hair in nearly every instance. It is not a dye; it is not sticky or greasy; on the contrary it makes the hair soft, youthful, beautiful and glossy; keeps it in curl. It is a perfect hair dressing, and can be used by ladies, gentlemen or children as a daily toilet requisite. Its influence is delightfully soothing.

Gold Democrats Will Follow Their Individual Wishes as to Candidates.

New Issues Have Taken the Place of Those of 1896.

Scheme of Fusion With the Anti-Imperialistic Movement Is Defeated.

Indianapolis, July 26.—The national ommittee of the Gold Standard Democratic party adopted resolutions expressing the opinion that the nomination of candidates by the national Democratic party for the offices of president and vice president is unwise and unexpedient, reaffirms the Indianapolis platform of 1896, recommends the state committees in their respective states to preserve their organizations and urges the voters not to be deceived by the plea that the money question has been done them in serving alongside of their finally settled. The scheme of fusion with the anti-imperialistic movement, originating with the recent mass meeting in New York city, was defeated.

Of the 39 members of the national committee there were present 19 members. Two of the committeemen held several proxies. A sub-committee presented an address setting out the proposition for reason set forth at the New York meet-

Upon the hearing of argument from Messrs. Chapman and Osborne of the New York committee and others, the gold standard men decided upon an immediate consideration of the question. The New York committeemen took back seats and listened to a discussion which ontinued for more than an hour.

In accordance with a suggestion by Charles Tracey of New York each member of the national Democratic committee expressed his views on the matter. Eastern and western men severally pposed the proposition, taking the ground that there had been dissatisfacion and withdrawals from the ranks of the national Democracy, and that the lacing of a third ticket in the field this year with the new issues now before the ountry would in no way tend to acomplish the end and aim of the organization of the national Democratic party in 1896. GENERAL YOSHUMA FUKUSHIMA. [Japan's general at Tien-tsin.]

"I desire to express the high appreciation of the British troops of the honor comrades of the American army, and of the high honor accorded me in having them under my command. "I blame myself for the mistake made

in taking their position by the Ninth regiment, not remembering that troops fresh to the scene of action and hurried forward in the excitement of attack were likely to lose their way. Still the fusion and a third party ticket with the position they took and gallantly stuck to all day undoubtedly prevented a large body of the enemy from turning the right of the attacking line and inflicting serious loss on the French and Japanese." General Dorward also expressed sympathy with the Americans in the loss of Colonel Liscum, commander of the regiment, and Captain Davis of the marine corps. He commended Lieuterant Smedley Butler and Lieutenant Henry Leonard of the marine corps and Lieutenant Louis Lawton of the regi-

ment, and praised Lieutenant Colonel

Who has not known the woman whose disposition is described by that one word sunny?" There's always a laugh lurking on her lips. Her cheeks are ever ready to dimple in smiles. Her household influence is as brightening and stimulating as the sunshine. Nothing can be crueler than to have this sunshine blotted out by disease. But this is a common cruelty. The young wife who was the sunshine of the home becomes its shadow. Every young wife should know the value of Dr. Pierce's Favorite Prescription in the protection and preservation of the health. It promotes regularity, dries the drains which enfeeble body and mind, and cures inflamma tion, ulceration and female weakness It nourishes the nervous system and gives to the body the balance and buoyancy of perfect health. It is a strictly temperance medicine.

NIPPED IN THE BUD. Elaborate Plan to Tunnel Into a Penitentiary Is Thwarted by Accident. Pittsburg, July 27.-One of the boldest

and most systematic plans for the release of one or more prisoners from Riverside penitentiary was thwarted Thursday by accident. The first theory advanced when the matter was discovered seemed to point to the release Imperial Authorities Are In of Alexander Berkman, the anarchist, who is serving a 22-year sentence for the shooting of H. C. Frick, the steel magrate, during the big Homestead strike of 1892, but the conclusion reached by Director Muth of the Allegheny police department is that the real object of the rescuers was to secure the freedom of the notorious real estate swindler, J. C. Boyd, who is serving a seven years' sentence in the penitentiary. This opinion is shared by the Pittsburg police officials also. Among the reasons brough forward to confirm this theory are the tion that there has been the slightest facts that Boyd is wanted in nearly improvement in the Chinese situation. every state in the union on charges of Indeed the general tendency of such news real estate swindles, has confederates as found light yesterday was to add to all over the country, and is accounted the steadily growing doubt as to the one of the wealthiest prisoners in Riverside. It is argued that Berkman's good faith of the Chinese government as friends could not afford the expensive outfit which was used in this instance, and the resources could not possibly equal those of Boyd's confederates.

The plan by which the rescuers hoped to reach the inside of the penitentiary wall was by tunnel from the cellar of a house on Sterling street nearly opposite one of the gates. Their work is remarkable, considering the obstacles to be overcome. Investigation showed that it was over 200 feet long, but because of its zigzag character had not reached the prison wall. One of the officers who crawled a distance of 201 feet in dark ers will be discovered when the tunnel is open from the surface, as is the intention. He thinks the man was overcome by the gases and his companions for fear of complications, fled.

The elaborate arrangements that had been made for completing the tunnel and for providing for safety of the diggers is a source of amazement to the authorities. An electric bell, connected with the entrance of the tunnel in the cellar, was used in giving the workers and watchers an instant signal in case of alarm, and an air pump had been used to keep the tunnel free from gas. It is estimated that the electric plant and other ap-

SOLID COMFORT.

When Reuben Filley entered the door of the Miranda after enjoying a solitary smoke in the "emigrant car," as Madge Hurst dubbed the Pullman, he beheld the following tableau:

Mrs. Hurst, following the example of all good chaperons, was fast asleep on a divan, soothed to slumber by the rocking and humming of the train. Behind her couch sat Chester and Madge, she making desperate pretense of accomplishing some slight fancy work, but not making much progress owing to the fact that even the most skillful of needlewomen cannot work with one hand. Chester Ives had possessed himself of the other and at the moment when Filley entered was murmuring some words that brought a rosier color to Madge's cheeks and a softer glamour to her usually bright and dancing eyes.

Draper and Florence were at the farther end, she reclining in the easiest chair to be found, and he at her side. conversing earnestly in a low tone. Her gracefully poised head, the earnest eyes looking full into his, the mantling color in her cheeks and the half sinile on her parted lips indicated that she was an interested listener, even as Desdemona hearkened to Othello of old. And yet all the world might have heard the burden of John Draper's speech. He was only telling her some of the adventures of days long gone by, when he and her father-the father she had never seen-were boys and young men together. From this starting point he went on to speak of their early struggles, when the foundations were laid of the great fortune Florence now possessed. Modest John never once alluded to the part borne by himself in adding to that fortune until now it needed seven figures to express it. But the girl divined all this, and when he ceased speaking she laid her hand caressingly on the back of his as it rested on the arm of her chair and murmured:

"How can I ever sufficiently thank

dears," averred the good lady, at which announcement Chester muttered, "Good Lord, I hope not!" in mock horror just loud enough for Madge to hear, which sent that young lady into convulsions of suppressed laughter.

Being awake and refreshed, it behooved Mrs. Hurst to do something for the general good. So a game of innocuous and rather tame six banded euchre was proposed and agreed to, although Chester whispered to Madge that "he would as soon play old maid or beggar my neighbor. Filley was compelled to join the circle, but he suffered tortures and qualms like those experienced by a hard drinker who is forced to quaff Sunday school lemonade and make believe he likes it.

Mrs. Hurst was the only one who really enjoyed herself that afternoon. John Draper, usually bluff and debonair, was quiet and preoccupied. Florence was distrait and on more than one occasion had to be recalled from a reverie when it was her turn to "pass" or "make it." All these varied experiences were gone through with on the evening of this third day of which I write. Draper's birthday, and in honor of the event Mrs. Hurst had dropped a hint to Gustave, the chef, to make a few extra preparations. So they were treated to a sumptuous repast, at the close of which the host leaned back in his chair and remarked:

"Well, Gustave has surpassed himself tonight! These Frenchmen are marvels of ingenuity and resource." "Have you forgotten what today is?" inquired Mrs. Hurst of her brother.

"Thursday, is it not?" responded John Draper. "Yes; Thursday, May 13, and the

fortieth birthday of a certain distinguished friend of ours," was the arch rejoinder.

A haif puzzled expression crept into Uncle John's face; then a smile of recollection rippled out.

"God bless me, so it is! I declare I had forgotten all about it. How good of you to remember it! What's all "You have always been good to me," this?" he exclaimed as the ladies rose and grouped themselves about his

THE PARABLE.

This is the parable of the barren fig tree. A man planted a fig tree in his garden. After waiting the proper length of time he came and sought the night be stormy, or if left up the fruit on it, but found none. The Jews though? that this was evidence that disconnected the pipes that connect these people had sinned, and as no such calamities came upon them they drew and later reconnected them. The efthe false conclusion that they stood well with God. Jesus disabuses their minds of such a belief. He tells them plainly that unless they repent they shall likewise perish. God has extended the day of mercy, but suspension is not pardon. Forbearance does not mean indifference. Delay does not decrease the certainty of punishment if during the delay they do not repent. These surroundings furnish the key to the parable. The fig tree represents the Jews. The vineyard represents the special privileges given to the Jews. The coming of the lord of the vineyard is the divine expectation of fruit among his chosen people. Being found fruitless, sentence of destruction is passed upon the nation. By the intercession of Christ, the vine dresser the sentence is postponed. But it avail ed nothing. The Jews did not repent and at the end of their last probation Jerusalem was destroyed, their special privileges were taken from them and offered to the gentiles.

Successful Invention of a Kansas City Man.

MORE PROPERLY A PREVENTER

By a Utilization of Scientific Principles the Device Is Made to Collect and Consume All the Gases-Whole Apparatus Can Be Put In Operation at Small Cost.

One of the greatest problems that confront cities in these days of manufacturing industry is that of overcoming the smoke nuisance. In Kansas City, with its rapidly growing importance as an industrial center, this problem is already a serious one. Various devices for doing away with smoke from the factory and furnace chimneys have been patented and are in use, but while they are of benefit it has only been in a limited degree. A Kansas City man has, however, invented a process which he asserts is capable of entirely obviating the emission or at least abating it so largely that the great volume of black, sooty smoke that is now belched from the city's forest of smokestacks will be made but lightly curling wreaths of blue clouds that will cause no dirt or Foster, an engineer in Kansas City. Mr. Foster has patented his invention and has applied for another patent to embrace an added convenience in its working.

Mr. Foster was seen recently by a reporter for the Kansas City Times. He was at work in his engine room. where his apparatus has already been set up, and showed its working. For the benefit of the reporter Mr. Foster the furnace with the smoke consumer fect was wonderful. When the consumer was not at work, dense volumes of smoke poured from the smokestack, and in less than a minute after the valves of the consumer were reopened the smoke had disappeared and only apparent heat vibrations rose from the

While this and similar contrivances are called smoke consumers the term is really a misnomer. They are properly smoke preventers. Smoke cannot be consumed, but can be prevented. It is only formed when combustion is imperfect. If it were possible, which has not yet been demonstrated, to produce in furnaces a perfect combustion, there would be absolutely no smoke The central idea of all so called smoke consumers is to create such an admixture of oxygen with the gas from the fuel as will produce perfect combus tion. Smoke is formed of the gases that escape from the furnace. For this reason a smoke consumer is not only of value as doing away with the unpleas ant effect of smoke, but is of great

Mr. Foster, in explaining his device. said that the principle in its operation is to draw the escaping gas from the sumer by means of the blast fan. All that are drawn in and forced back into the furnace are consumed and leave no trace.

The apparatus consists of a steam boiler furnace with a suction and force blast fan case in which is the blast fan. There is a smoke and gas conducting pipe of about 12 inches in diameter which connects with the induction opening in the side of the fan case. A returning pipe, smaller in circumference than the smoke and gas conducting pipe, runs from the blast fan through the furnace wall to a position beneath the furnace grate. Connected with this latter pipe is a smaller pipe, the furnace. The whole contrivance cost, and it costs nothing to operate,

use for other purposes. This cost, the inventor asserts, can be saved many times over by the saving in fuel. Without the use of the smoke consumer from 50 to 75 per cent of the heating power of the fuel is lost in the gases that escape. With the apparatus the loss is about 40 per cent. Mr. Foster has at times since putting his desert into an oasis ere he knows in his smoke consumer increased the evaporation from the boilers as much as 22 per cent. Because of the almost perfect combustion secured the furnace will burn any fuel that is at all combustible. The pipes of the consumer can force into the furnace if occasion requires 2,000 cubic feet of air each minute.

Mr. Foster had been working and experimenting for eight years on his invention before he perfected its mechanism. He is now forming a stock company to place the device on the market and expects to have a factory in operation by next fall. He has already had a liberal offer for an interest in his patent, but has refused it.

The statement that there is still hope out it is constantly diminishing, is held here to define accurately the situation. The Chinese minister in London, Sin Chih Chen Lo Feng Luh, yesterday received a telegram from Sheng, director of railways and telegraphs, to the effect that an imperial decree, in the following terms, was issued on July 24:

"It is fortunate that all the esentatives except Baron Von Farland; Griffith and Donahue. Ketteler are found in safety and un- At New Yorkharmed. Provisions in the shape of New York ..... 00020002 -4 9 1

The Morning Post goes so far as to as-Bert that there is now direct communication between the Chinese authorities in Pekin and London, and that the ministers are safe. However this may be, it is quite certain that the attempts of the French, Italian and other consuls to get direct replies from Pekin have utterly failed, and it is pointed out that the ability to supply the legations with fruit and vegetables involves the conclusion that communication is not impeded by

Thus, despite the daily alternation of hopes and fears, the reiterated Chinese assertions of the safety of the ministers fail to carry conviction, and the de cision of the United States not to delay military measures is approved as the only possible course to pursue. The Daily News says that negotiations with the Chinese authorities, if there be any authority in China, are useless.

It turns out that as early as July 12 an appeal from the Emperor of China to Queen Victoria for mediation, dated July , was handed to the Marquis of Salisbury; and it is understood that the other powers were not communicated with until July 20.

The Shanghai correspondent of The Daily Express asserts that three versions of Sir Claude MacDonald's letter believed all three originated from Chinese sources. He adds, however, that Li Hung Chang says the legation party ought to reach Tien Tsin on Sunday.

This was an action brought for the alienation of plaintiff's wife's affection and for \$6,000 damages. The jury found Knott guilty, and gave plaintiff judgment for one cent.

Judge Parrott, in giving plaintiff a new trial, said: "The verdict is set aside as not consonant with logical deduction. If there was alienation there was damage, and the sum specified in the award is entirely too significant for notice. The affections of a woman cannot be treated at so low a figure. The plaintiff will be given a new trial."

Crouching behind a bowlder and peering out now and then with staring eyes, and again covering her face with her hands and rocking her body to and fro, the colonel's daughter gasped and sobbed and waited. By and by she missed the reports of the carbines, and the sound of foot-

The plain cream is liked by most people better than the cooked custard. To make it use three pints of cream to one pint of milk, and one and three-quarters cups of sugar. Scald the milk, melt the sugar in it, and when it is cool add the mixture to the cream. If vanilla is the flavor required, add a tablespoonful of the extract or of the pounded vanilla bean, sugar; if lemon, a tablespoonful of the extract. For pistachio ice cream blanch and pound to a paste threequarters of a cup of pistachio nuts and one-quarter of a cup of almonds. Van Gordon says he pushed along until vegetation finally ceased entirely and the earth began to show many bright saltlike crystals, and at the same time the entire gulch looked more and more as though it was leading to a vast alkali deposit. Near by was a small butte, about 50 feet in height, and from there, with the aid of field glasses, he saw a pool which seemed as follows: (See note of explanation at bottom.) to him to cover an acre of ground. Finishing Thy Work.

Finish thy work; the time is short; The sun is in the west; The night is coming down; till then Think not of rest

Finish thy work; then wipe thy brow; Ungird thee from thy toil; Take breath, and from each weary limb Shake off the soil.

Finish thy work; then go in peace, Life's battle fought and won.

Hear from the throne the Master's voice: 'Well done! Well done!" Finish thy work; then take thy harp;
 Give praise to God above;

Sing a ne ? song of mighty joy And endless love. Give than a to Him who holds thee up In all .y paths below, Who made thee faithful unto death

And crowns thee now. -W. H. Robert.

Consuls Say That Situation Demands the Presence of a Military Force.

Increasing Reports of the Massacre of Foreigners.

Ministers Said to Be Held as Hostages to Await Result of Peace Overtures.

London, July 30 .- The Shanghai corlearn that Li Ping Hong and Lu Chuan Lin, governor of Kiang Su, both rabidly anti-foreign, are advancing toward Pekin with large bodies of troops. Their advent must seriously affect the situation there. Today (Sunday) the consular body decided that the situation demands the presence of a military force in their governments accordingly."

The Canton correspondent of The Daily Telegraph says: The Triads have be come numerous and threatening in Hai Nan. The taoti and the local mandarins are terror stricken, and decline to protect foreigners. All the mission aries, except three, have left with their wives and families. The natives of the Nodoa district of the island were so frightened that they all joined the ranks

Serious disturbances are expected beween Aug. 1 and Aug. 15, during the festival to be held to appease the shades of the dead. The Boxers are charging large sums to the Chinese for passports rom Pekin to Tien Tsin. Lao Yun Fu the black flag chief, has refused to march on Pekin unless Viceroy Tak Su will furnish him with 20,000 soldiers.

The Shanghai correspondent of th Daily Telegraph says he is still firm! invinced that the ministers are safe out, with the exception of an alleged essage from the Japanese legation in Pekin, dated July 19, brought by a runner, saying that the legation was still defending itself, nothing has yet been published giving anything in the nature

On the other hand, the daily-increas ing reports of the massacre of mission aries and foreigners leave only the most slender thread upon which to hang a

W. E. Robinson of the Globe thinks Manchester next year. He says:

yacht clubs \$500 challenge cup for 21- 4: footers by the Lookout, challenger from the Manchester club, should serve not only to increase the prestige of the winning club in its rise to prominence yachting affairs, but should also enefit the sport at large.

The benefit to the sport should ome from the fact that boats of more substantial build than the present ones will be required to stand the possible knocking about over the Manchester courses. Extremely light construction is today the bane of the sport in many directions, and anything that will tend to do away with it should be gladly welcomed. Boats of the "scow" type will undoubtedly race for the cup next year as this, but if they are compelled to a less flimsy build the possible loss of a little speed will be amply made up by their general seaworthiness and availability.

"That the need of stronger construc ion is not over emphasized is clearly shown by the collapse of Tashmoo in the first decent breeze she encountered, and numerous breakdowns on the other boats. For the sake of the sport, for the sake of owners themselves and for aggravating breakdowns, there should Time 1h. 45m. be something done to stop the competition for extreme lightness in hull, spars and rigging.

"In addition to the fact that the Manchester courses necessitate a stronger boat, it should be perfectly feasible for challengers and defending clubs to agree upon restrictions that would obviate many of the present troubles and give better sport. It is to be hoped that the lesson of

"Undoubtedly she was faster than she was last year, but she was not quite problematical one, for yacht designing is far from being an exact science, and yet in spite of the advantage that will come by a transfer of the cup, one cannot help a tinge of disappointment that nothing new was tried.

AN INDIANA HEROINE.

Giri Whose Courage Probably Saved Many Lives.

Miss Cora M. Wise holds a warm place in the hearts of many persons whose lives she probably saved. She is the telegraph operator and tower tender at Sands, Ind., a little station on the "Big Four."

The little tower that is her office stands 40 feet above the level of the track and the track is on an embankment 20 feet high, making her office about 60 feet above the main level of the ground. She was sitting in this little tower, having given the signal to the extra freight train that all was clear. The train pulled out of the siding, and as it was passing her little tower a car jumped the track. This threw four other cars off and all of them came with great force against the tower, overturning it and sending Miss Wise to the ground in a mass of wreckage, which soon took fire from the overturned stove, and in a short

time was consumed. Miss Wise ex tricated herself and managed to hobble around and climb the steep embankment, where she found a man and ordered him to flag No. 1, a fast passenger train, which was due in a few minutes. She could do no more, how, ever, the effort of climbing the embankment in her exhausted condition eing too much for her, and she ask to be taken to her home in New Point a mile away. Tender hands lifted her o the cab of an engine and in a few minutes she was being rapidly taken where medical assistance could be rendered. She became unconscious im-

Miss Wise does not seem to think FOR nuch of her deed and modestly refuses to be considered a heroine, but nevertheless it was only her great desire to save the passenger train that enabled her to retain consciousness and climb to the top of the embankment and order the flagman to signal the train.

# CROWD WAS STUNNED.

Hardly Realized What Had Happened.

Bressi Went From America Finding of a Document Indicating That a to Commit the Deed.

Worked in Silk Mills at Paterson, and Was of Inner Circle of Anarchists.

Rome, July 31 .- The arrival of messages of sympathy and condolence shows that all over Europe there is universal | follows: sorrow for the death of King Humbert. Anarchists are execrated. The whole Italian nation is furious against them. No fear of revolution is felt. The people are so aroused in their indignation that no fear is now felt that anarchy will dare to raise its head.

A proclamation from the queen regent has arrived announcing the ascension of the new king and stating that parliament will be convoked after the funeral. Several warships have started to meet

PRINCE OF NAPLES. [New King of Italy.]

All the military and naval forces throughout the country today took the oath of fidelity to the new king. All the deputies of the extreme left now in Rome met together yesterday and adopted a resolution expressing abhor-

The socialists and anarchists have issued a formal condemnation of the killing of King Humbert.

tragedy are available. It happened so quickly and unexpectedly that the king was dead almost before the spectators realized what had occurred.

No special precautions had been taken. Very few police were in attendance, and only a small guard of soldiers was keeping the way for the carriages. The king, amid the cheers of the crowd, came out smiling, accompanied by General Ponzio-Vaglia. He had entered the carriage and was just driving off, when the revolver shots were fired in quick succession. The first shot wounded the king in the neck, the second, the fatal one, pierced his heart, and the third broke the arm of the already dying sov-

ereign. The crowd was stunned by the unexpected scene, but speedily a rush was made toward the assassin. He did not attempt to escape, and was roughly handled until the carabineers formed a cordon and secured him from the fury of the people.

The assassin, on reaching the guard coom of the caribineers, was in bad condition, his hands and arms being lacerated and bloody, and his clothes torn by the angry crowd. Replying to questions he hissed through his clenched teeth.: "Tell them I came from America on purpose to kill King Humbert. I have only just arrived from America and know no one. I spent a day at Bologna and then came in to Milan."

A search, made at his home at Prato, esulted in the finding of several compromising letters from New York. One signed by a woman was dated June 25. In this letter the writer asks whether all will soon return. Bressi had been absent from Prato for six or seven years. His parents live there, and he has a brother in an Italian infantry regiment.

Bressi a Pronounced Anarchist. New York, July 31.-Angelo Bressi lived in Paterson for over a year. He appeared to have had various names, of custody for the murder of the King of Italy was one. He was employed in Hamil & Booth's silk mills. His close friend there was Cariboni Sperandino, the man who a few weeks ago shot down his foreman and then killed himself, leaving behind a letter telling how he had been selected by lot to kill King Humbert, but living so far away from Italy he had a choice, and he killed the foreman instead. A few months ago a man, said to be Count Moleteski, the head of the Italian anarchists, was in Paterson, and during his stay Sperandino and Bressi were his companions, and they showed him about the city, and introduced him to others in the city, and who were his mentors there. It would seem that his friend baving faltered at regicide, Bressi took up his burden where Sperandino refused it, and went across the ocean to carry out the decree that Humbert should die.

home Was in Hoboken, where his wife and little girl live. He never brought them to Paterson. He roomed right in the centre of the anarchist section. To some it was known that his radical ideas were extreme, and that he was of the

inner circle of the anarchists. Paterson has long been a hot-bed of worked with this element without allowing the socialists to know that it had the support of the violent ones. The anarchists tried to control the socialists, Those Who Saw King Humbert Killed and falling, dropped away from the movement and denounced the socialists because of their peacefulness.

Waco, Tex., July 31 .- A mysterious double tragedy occurred early Monday at the house of M. C. Kingsbury, a leading citizen of this city. Duncan G. McLellan, Jr., and Myron C. Kingsbury, brothers-in-law, were found dead in Kingsbury's bedroom, their throats being cut. It is the general opinion that the men were murdered. Mrs. Kingsbury said she was awakened about 2 o'clock by a noise in her husband's room, across the hall. She ran into the room and found her husband and her brother dying. She saw no one run from the room.

Tampico, Mex., July 31.-Fifty-eight Bahama negroes, contract laborers on the Mexican Central railroad, started a riot near here Monday over one of their number being arrested. Many negroes severely beat a policeman. The Mexican populace took sides with the policeman, a pitched battle ensuing. Two ne groes were mortally and 20 seriously wounded. Attempt to Rob. THIS IS HOW SHE CAME TO ME.

Charles C. Murdock, an inmate of he Soldiers' Home at Chelsea, met with rough treatment Monday at Milton at the hands of a young fellow who afterward gave his name as James Murray and James Muldoon. Murdock was on School street when he was approached by Murray, or Muldoon, who grapped him by the neck and struck him a blow in the face, knocking him down. Murdock got up and shouted for help. Upon that, Murray ordered him to hold up his hands and then struck him another blow Just then a lady bicyclist came along DEWEY SQ. and shouted to Murray to stop. Upon this he turned around, and seeing a man approaching on the run, he hit Murdock another blow and ran.

Officer Higgins put in his appearance How a Girl Adroitly about this time, and after a long chase Turned It Into Romance. succeeded in arresting Murray.
